

# GNV250

**Full size features. Entry level price.**

# Model Selection

Way of Life!

- **2015 GW250L5**
  - Colours: Black, blue
  - MSRP: \$4,199
- **2015 GW250FL5**
  - Colours: Blue/white, black
  - MSRP: \$4,499
  - Full fairing

# Styling - Headlight

Way of Life!

- **The B-King styled headlight makes a prominent statement with its slim angled shell**
- **A bright 12 volt 60/55 watt headlight bulb is supported by position lights on each side**
- **Above the headlight, a black visor wraps the top of the instrumentation**

# Styling - Bodywork

Way of Life!

- **Front turn signals blend into the bodywork to make a bold statement**
- **Below that, the naked structure is surrounded by bright chrome head pipes and sweeping mufflers extending to the rear**

# Styling – Fairing

Way of Life!

- The fairing on the GW250F provides protection from the elements
- Built-in turn signals

# Styling - Seat

Way of Life!

- The contoured seat makes a slim connection to the fuel tank and extends rearward to a raised passenger platform
- A low 780 mm (30.7") seat height blends with the motorcycle's stylish appeal and provides comfort for rider and passenger
- A stylish silver finished passenger grab bar adds a secure holding position

# Styling - Rear View

Way of Life!

- **Dual chromed exhaust mufflers are attractively capped and sit below a bright dual lens tail and brake light**
- **Striking design and high quality components mean that the GW250 impresses whether coming or going**

# Combination Meter

Way of Life!

- The combination meter provides both information and style
- The central focus is a large tachometer and a gear position indicator
- Below the gear indicator is an Eco indicator

# Combination Meter

Way of Life!

- To the right of the tachometer is an LCD digital speedometer, fuel gauge, odometer, two trip meters, clock and maintenance reminder
- LED indicator lights include oil pressure, temperature, FI, neutral, high beam, turn indicators and RPM indicator

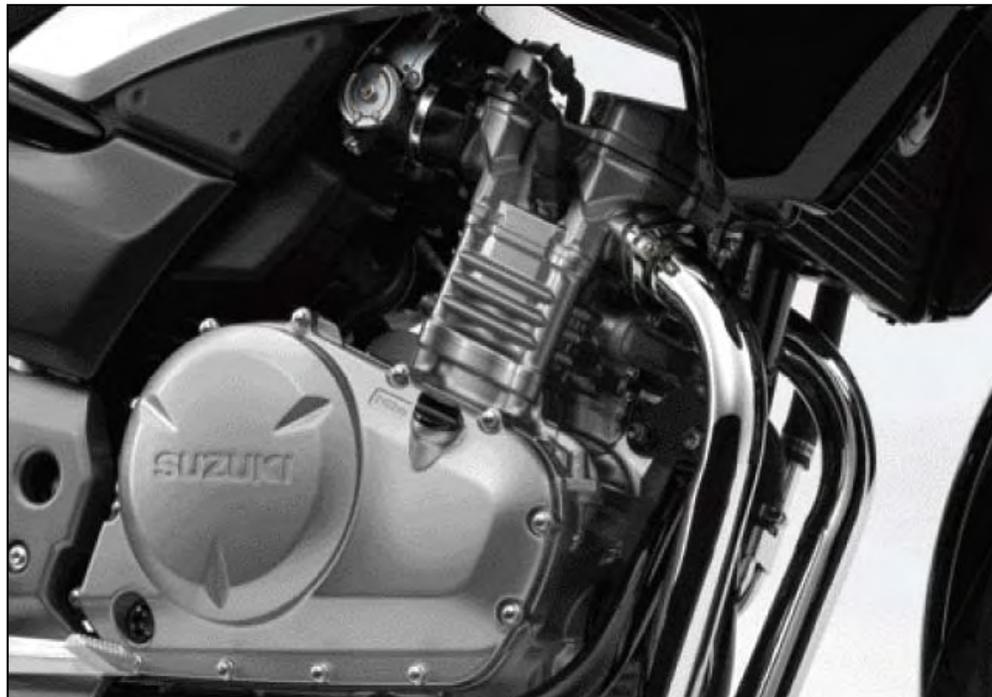

# Engine

Way of Life!

- **The parallel twin-cylinder 248 cm<sup>3</sup> design makes a lightweight and compact powerplant**
- **The long-stroke engine (53.5 mm bore x 55.2 mm stroke) produces the ample low and mid range punch for powering through urban areas and open roads**

# Cooling System

Way of Life!

- **Liquid cooling helps keep the bike in the optimum performance zone under all the conditions**

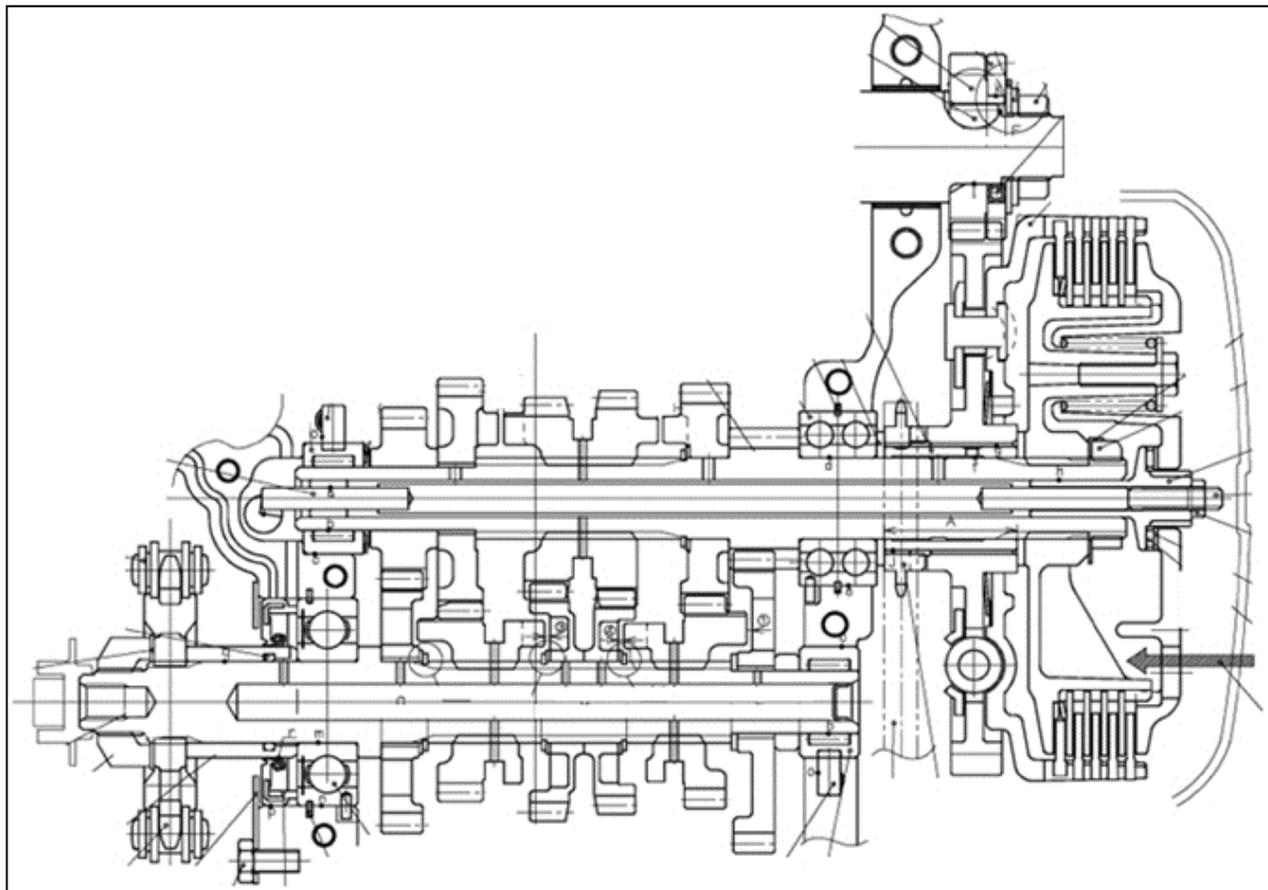

# Transmission

Way of Life!

- **A six-speed transmission improves fuel economy and provides brisk acceleration**

# Exhaust System

Way of Life!

- **The two-to-one-to-two exhaust system increases engine torque**
- **Dual chrome head pipes carries exhaust that concludes at long and low chromed mufflers astride the rear wheel**
- **The exhaust system is equipped with a three-way catalyst and O2 sensor. These features combined with Pulsed-air injection and an accurate fuel injection system keep emissions to a minimum.**

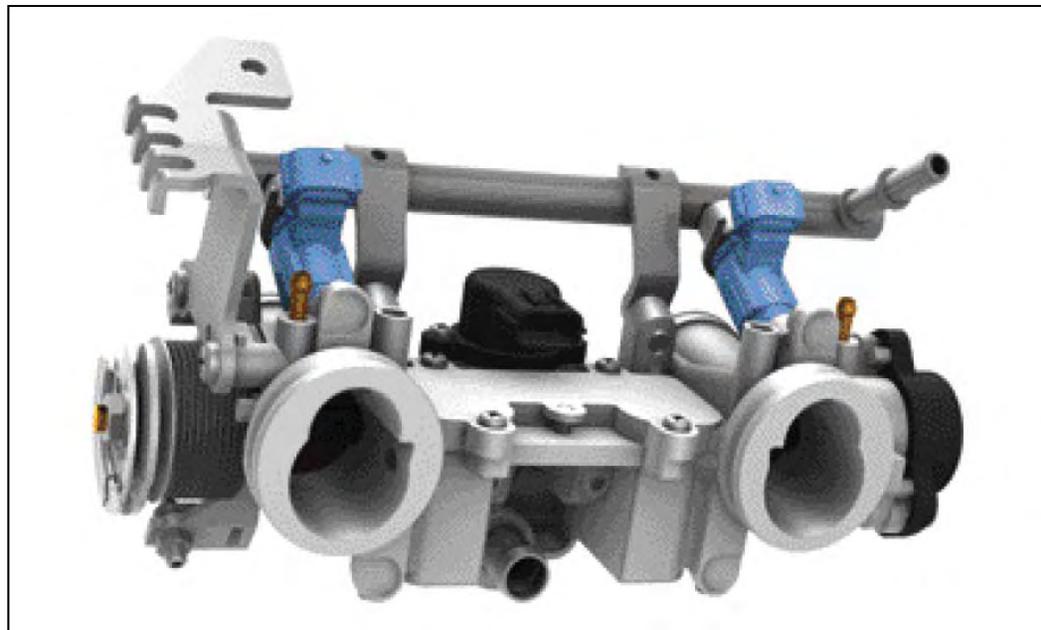

# Fuel Injection System

Way of Life!

- The fuel injection system gives the rider precise throttle response while improving fuel economy and reducing exhaust emissions
- The two 26 mm Mikuni throttle bodies include a built-in idle speed control (ISC) system

# Fuel Tank

Way of Life!

- **The 13.3-liter fuel tank allows long-range riding and is shaped to provide comfortable seating and improve balance when stopped**

# Chassis

Way of Life!

- **The semi double-cradle frame is designed to provide ample support for a variety of riding styles, while securing this naked bike's more visible parts**

# Brakes

Way of Life!

- **Hydraulic disc brakes front and rear provide consistent and controlled braking**

# Tires & Wheels

Way of Life!

- **Strong 17" three-spoke aluminum wheels are wrapped in road-grabbing tires rated to provide sport-style performance through a wide range of road conditions**
- **Tire sizes are 110/80-17 up front and 140/70-17 at the rear**
