UTILITY V

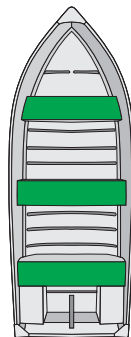

Function is what the Utility V series is all about. They are built as tough as can be to stand up to the rigors of years of hard use. Popular with boat liveries and resorts they are very low maintenance. Cross ribs are spaced every 10" and strong transom bracing along with rigid tank seats insure a very strong and safe hull. All interiors are finished in a non-glare, non-slip finish and all models feature transom carry handles. Models range from 12'-16' and these boats have max horsepower ratings that range from 10 to 25 hp.
