

UTILITY V boats are built extremely tough as can be to stand up to the rigors of years of hard use. Popular with camps and resorts they are very low maintenance. Cross ribs are spaced every 10", strong transom bracing, and rigid tank seats insure a very strong and safe hull.

LAKER models are 16' Utility V models on steroids. We expanded the beam to 74" wide, increased the bow depth, and added stronger gunwales. Making a great series of boats even better.
