WHEN BIG JOBS DEMAND HEAVY-DUTY PERFORMANCE

The new 12', 14' and 16' pusher plows add to the lineup of WESTERN® PILE DRIVER™ steel-edge plows. These three new sizes are designed specifically for wheel loader applications. The two-piece, steel trip-edge design delivers a cleaner scrape for hard-packed snow and ice while protecting operators and their equipment when encountering hidden bumps and obstacles.

PILE DRIVER™

STEEL-EDGE PUSHER PLOWS (12', 14', 16')

**Interchangeable attachments for maximum versatility (wheel loader carrier option shown)*

DESIGNED SPECIFICALLY FOR WHEEL LOADER APPLICATIONS

TWO-PIECE, STEEL TRIP-EDGE

The two-piece, steel trip-edge design delivers a cleaner scrape for hard-packed snow and ice while protecting operators and their equipment when encountering hidden bumps and obstacles. Constructed with eight or twelve extension springs, depending on the blade width, the PILE DRIVER™ pusher plows are built to handle large snow loads and stresses.

INTERCHANGEABLE ATTACHMENTS

Interchangeable attachments offer the flexibility to quickly and easily attach the pushers to various pieces of equipment within a fleet. Attachments include a universal post option for wheel loaders and three different wheel loader carrier options along with their compatible models.

UNIVERSAL POST FOR WHEEL LOADERS

FLOATING ATTACHMENT PLATES

Floating attachment plates smooth out bumps and allow side-to-side movement, keeping the pusher in contact with the surface at all times.

FLOATING SHOES

Floating shoes keep the cutting edge level on uneven surfaces to maintain a clean scrape.
