# ULTRAMOUNT® 2 ATTACHMENT KITS FOR TRACTORS

## SNOWPLOWING VERSATILITY FOR TRACTORS

### PLOW COMPATIBILITY

The UltraMount® 2 attachment kits allow for direct attachment of a range of WESTERN® heavy-duty straight blades, v-plows and winged plows to tractors for improved plowing efficiency. Check out our Quick Match program at [westernplows.com/quick-match](http://westernplows.com/quick-match) to identify which plows will fit your specific tractor model.

### HEAVY-DUTY STRAIGHT BLADES FOR TRACTORS

The best value from a cost perspective when compared to other snowplow types, straight blade plows also offer operators a number of benefits. Straight blades are the easiest plows to operate with simple controls, and because there are fewer moving parts, they are extremely durable and reliable. When it comes to clearing large, open lots, straight blades are an efficient way to get the job done.

UltraMount 2 attachment kits for tractors are available for the following WESTERN straight blade models:

- PRO-PLOW® Series 2 (7'6", 8" and 8'6" models)
- PRO PLUS® (8', 8'6" and 9' models)

### V-PLOWS FOR TRACTORS

Providing power, productivity and performance, v-plows are a great choice for operators that handle a variety of job types. Operate in v-mode to break through heavy snow or drifts, scoop mode when in tighter spaces or for carrying large amounts of snow, or lock the wings in straight blade mode when plowing big, wide open spaces. Bottom line, v-plows are the most universal plows to handle all plowing needs.

UltraMount 2 attachment kits for tractors are available for the following WESTERN v-plow models:

- MVP 3™ (7'6", 8'6" and 9'6" models)

### WINGED PLOWS FOR TRACTORS

Adjustable and multi-position wing snowplows offer unmatched versatility, letting operators automatically adjust the wings to the most efficient plowing configuration for the job. Adjustable wing plows offer the most control and maneuverability by allowing the wings to move into retracted straight, expanded straight, windrow and scoop positions, all at the touch of a button. Whether plowing in large areas or tighter spaces, get more jobs done faster with winged plow efficiency.

UltraMount 2 attachment kits for tractors are available for the following WESTERN winged plow models:

- PRODIGY™
- WIDE-OUT™ (8'-10' model)

### EASY INSTALLATION

Designed for a wide range of tractor models, the UltraMount 2 attachment kits have a removal push beam that allows for easy attachment to and removal from tractors. Plus, there is no need to uninstall the mount to reattach the loader system after plowing. The mount kit will come standard with a control harness and battery cable needed to operate FLEET FLEX enabled WESTERN snowplows.

### LIGHT KIT (ACCESSORY)

The light kit includes a switch and harness to be installed on the machine and will operate either LED or dual-halogen NIGHTHAWK™ headlamps.
