

5075M Utility Tractor

(75 engine horsepower*)

Operator station options

Choose from two open station options: the Standard Isolated Open Station or the Premium Isolated Open Station. Cab trim options include the Standard Cab with choice of mechanical seat or air suspension seat, or a Premium Cab with loader window in the roof, and a sound system ready for Bluetooth and satellite radio.

Loader compatibility.

Quik-Park™ loaders in both self-leveling and non-self-leveling configurations available to handle just about any loader chore with ease.

Tire options.

Choose from 11 unique rear tire options and 12 front tire options to meet your needs in a variety of applications. Includes radial tires, bias tires and turf tire options

2WD or MFWD.

Choose the standard 2WD configuration, or if you need more traction and more power in rough terrain, opt for Mechanical Front Wheel Drive (MFWD). Combine with PowrReverser™ Transmission for the ultimate ease of use.

Transmission options.

Choose the 12F/4R SyncShuttle Plus Transmission or one of three PowrReverser™ Transmissions with convenient left-hand reverser mounted on the steering column.

Economy PTO.

Low intensity PTO applications benefit from the EPTO setting. Run the engine at just 1,700 RPM and save up to 20% on fuel costs. Plus operators will appreciate less noise, vibration and wear and tear on their machine.

Final Tier 4 Compliant John Deere PowerTech™ Diesel Engine with hassle-free emissions solution.

No extra fluids.
No extra effort.

Tractor Weight.

Heavy-duty components yield increased tractor weight, translating to added durability, reliability, and capability – put more power to the ground when handling demanding tasks.
