Frontier Grooming Mowers

When you've got demanding mowing projects in store, why settle for anything less than equipment that's rugged, reliable, and ready to go when you are?

With Frontier grooming mowers, you don't have to settle. Whether you choose the versatile flex-wing mowers, powerful rear discharge mowers, or sturdy side discharge mowers, you get exceptional strength, performance, and dependability with every pass. And check out this added benefit: 5-year warranty on Frontier gearboxes!

All Frontier grooming mowers come standard with features like spring-loaded idlers for increased belt life, saving you downtime. Plus, all blades are made from heat-treated alloy steel for maximum performance in a variety of conditions. And floating hitches flex to allow the mower to better follow the terrain with less stress and wear to the tractor drawbar. Now you can equip your Frontier grooming mower with optional pneumatic tires. They flex to absorb weight; providing less ground pressure and less vibration.

All these benefits and more add up to unrivaled mowing capacity. Why settle for anything less?

FRONTIER
EQUIPMENT™
Rugged. Reliable. Ready.

Rear Discharge Mowers

Whether grooming your grounds, parks, or sports fields, Frontier rear discharge mowers have your cutting needs covered.

All four models feature a lubricated roller bearing design and bolt-through solid rubber tires, reducing the possibility of roll off. And all models come standard with a quick-detach chain shield assembly for added safety.

What's more, a rounded front/tapered rear deck design allows for close mowing along trees, fences, buildings, and other obstacles. You'll increase your productivity by reducing time spent trimming.

iMatch Quick-Attach Hitch System

Frontier rear and side discharge mowers can be configured to utilize the iMatch™ ASAE Category I quick-attach hitch system. The innovative and affordable iMatch system converts a 3-point hitch to fixed hooks and attaching points, which allows for easy connection to iMatch-compatible grooming mowers, rotary cutters, blades, ballast boxes, tillers, and more. Simply back up your tractor and slide on the PTO shaft. Available on all 4000, 4010, and 90 Series Tractors, iMatch is a welcome alternative to the sometimes challenging and awkward task of lining up 3-point hitch implements. iMatch™ hitch conversion kit sold separately.

Mowers – Rugged. Reliable. Ready.

Side Discharge Mowers

Frontier side discharge mowers provide a high-quality finish cut in a variety of applications.

Both models feature four stagger-mounted, spring-dampened caster wheels, allowing the mower to follow uneven rolling ground without scalping. And a lubricated roller bearing design and bolt-through solid rubber tires reduce the possibility of roll off.

The V-forward deck design creates a high velocity air tunnel for fast, even material distribution – even in difficult conditions. And v-belt drives provide quiet, smooth operation as they protect the tractor and mower from damage caused by sudden shock loads.

GM1060S □ GM1072S

Flex-Wing Mowers

Specifically designed for large-area turf mowing, Frontier flex-wing mowers turn major jobs into miniscule ones, saving you time and money.

Each model features flexible wing decks for superior performance in commercial mowing applications. You'll zip through terrain, leaving a finish-quality cut. Plus, all come equipped with round front, tapered deck-style mower decks for a closer trim.

For added safety, the transport latching mechanism automatically engages when the decks are raised into transport position, and a quick-detach chain shield assembly is standard.
