# Frontier Plotmaster Food Plot Seeders

**FP22 Series**

## 3-Point and Pull-Type Models Available

From hunting to wildlife conservation, there's no tool like the Frontier Food Plot Seeder to help you get more out of the environment. With these affordable machines, you can **disk, cultivate, deposit seed, pack soil, cover, and level in a single pass.**

### Start by preparing the seedbed.

Frontier Food Plot Seeders work in all types of soil conditions using notched disks and a standard S-tine toolbar with as many as five rugged 9-inch sweeps to lift the soil and spread it evenly for a smooth, tabletop seedbed. Now available, an optional second S-tine toolbar equipped with additional sweeps for increased tillage.

### Time to place the seed.

Any size. From typical grass seed, to corn, to a blend of your own design, the FP22 Series uses an electric drop seeder that distributes seed directly into the cultivated area. Adjustable scatter plates help ensure seed stays inside the tilled area.

**The finishing touch.** Once the seed hits the ground, a flexible drag chain levels the soil and covers the seed for uniform soil contact. Optional smooth roller attachment connects to the drag chain to provide better seed-to-soil contact.

Frontier Food Plot Seeders are sold and supported by John Deere, the most trusted name in farm, ranch, and lawn equipment. Talk to your local John Deere dealer, your exclusive source of Frontier Equipment for more information on the Frontier Food Plot Seeders.

### The total package

The versatile "one-pass" FP22 Series Food Plot Seeders are the perfect tools for tackling your tillage and seeding chores. 3-point models (*above*) are available in three affordable sizes with working widths of 3.5 to 7 ft. Hook up a Frontier Food Plot Seeder to your 30- to 100-horsepower utility tractor, and you've got one tough, do-it-all combination.

### Pull the muscle

With the FP2204P pull-type model (*above*), you can put the same powerful tillage action behind your 20- to 40-horsepower ATV, Gator™ XUV, and HPX Series Utility Vehicles. It offers a 3.5 ft. working width, making the FP2204P a compact solution for planting in remote, wooded areas.

# pass with the Frontier Plotmaster Food Plot Seeder

## Details – Frontier Food Plot Seeders

Frontier Food Plot Seeders feature a single S-tine toolbar equipped with up to five rugged 9-inch sweeps that provide powerful tillage action to break through tough, hard ground. Heavy-duty 16- or 18-inch notched disks (*inset*) help turn hard soil into soft seedbeds.

The drag chain is designed to closely follow the seed drop zone, ensuring that on every job, seeds are covered with the proper amount of soil.

The FP22 Series comes equipped with an electric drop seeder that allows you to plant a wide range of seed. And with up to 93 pounds of capacity and up to 96 inches of seeding width, you can cover more ground in less time.

An electric lift system allows you to set the proper tillage and seeding depth. When it's time for transport, simply use the lift system to raise the implement.

Gang angle adjustments are quick and easy. A convenient adjustment pin lets you increase or decrease the angle of the disk gangs when working in a variety of soil conditions. For heavier residue, increase gang angle. Or reduce gang angle for a more level soil profile.

## Options – Frontier FP22 Series

Secondary S-Tine toolbar (*optional*) amplifies the tillage action of your machine. Best of all, set-up is effortless. Just slide the toolbar into the implement frame, lock the pins, and you're ready to till.

For superior compaction, go with the optional smooth roller. It follows behind the drag chain to pack seed firmly in the soil (*top*), or position it atop the drag chain for breaking up stubborn clods (*bottom*).

Optional native seed kit lets you plant warm season grass and other light, fluffy seeds. It comes with a rear-attach seed curtain (*left*) to help control seed scatter, and a seedbed leveler (*right*) that hooks up to a S-tine toolbar to provide a smoother soil profile.

The frame grating kit (*optional*) includes two metal grates and attaching brackets. Fasten the grates to the implement frame for transporting material, such as seed bags, tillage accessories, and more. Be sure to secure supplies with heavy, durable straps. (*Straps not included.*)

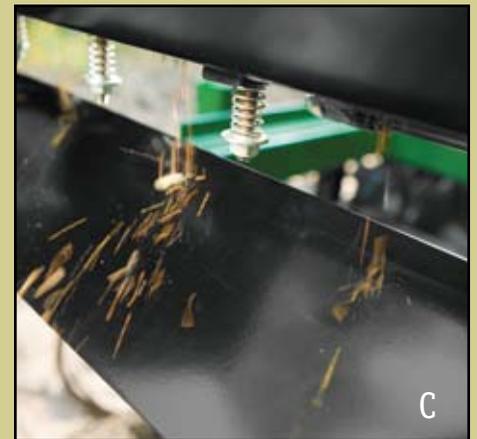

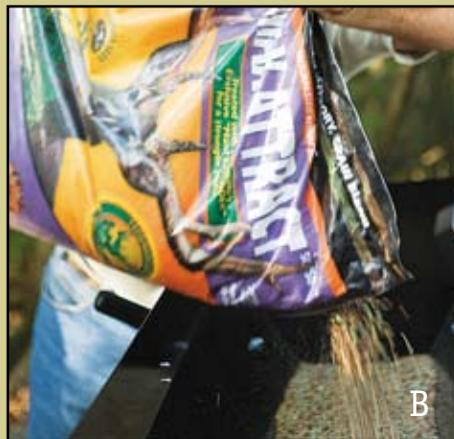

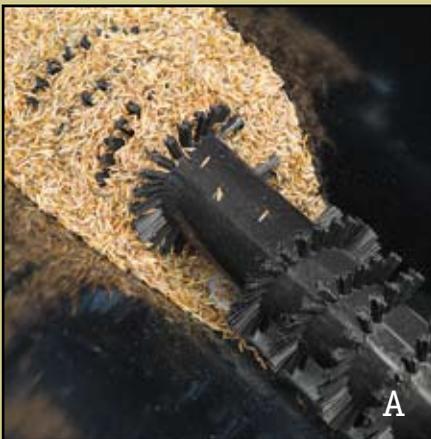

# Nature's Greatest Gift

## Frontier FP22 Series Food Plot Seeders

### A solo effort

Why use two machines when you can get the job done with one? The Frontier FP22 Series Food Plot Seeders eliminate the need for separate tillage and seeding tools, allowing you to disk, cultivate, deposit seed, pack soil, cover, and level, all at the same time. And with one machine, you cut down on costs – no matter the operation. So whether you're a sportsman, homeowner, land manager, gardener, landscaper, or small-acreage farmer, this tool is for you.

### Name your seed

The VERSA Seeding System™ with reverse-auger brush (A) allows you to drop almost any kind of seed, including grass seed and hard-to-plant seed blends (B), and will deliver seed under varied conditions. *(Seed brush shown without protective shield. Always operate machine with seed brush shield in place.)* Adjustable scatter plates (C) allow you to set the angle of seed distribution for accurate placement, reducing seed loss and cutting costs.
