

Perfect seedbeds begin with the Frontier Mulch Finishers

Introducing the 22 Series Mulch Finishers – the quickest and simplest solution for proper seedbed prep. From tilling hard, layered soil to preparing existing food plots for reseeding, the 22 Series Mulch Finishers are designed for versatility and performance.

Choose from three affordable models: MF2204, MF2206, and MF2208. They're ideal for tractors from 30 to 100 horsepower. The 22 Series Mulch Finishers come with 6, 8, or 12 disk blades for excellent residue management, and are equipped with vibrating S-tines to help you achieve uniform tillage depth using any one of **three distinct ground-engaging options.**

Like our standard **9-inch Sweeps**. These rugged attaching points lift the soil and spread it evenly for a smooth, level seedbed.

Or durable **Chisel Spikes** (*optional*) that let you till and break up compacted soil in no time at all. And because the spikes pull through soil with less draft, you'll conserve fuel over each pass, reducing costs. Reversible tips give your spikes longer life.

Try the optional **Turning Tips**. They offer greater ground penetration through heavy residue, grass, or tough ground cover. Turning Tips break up soil compaction while turning over soil to bury residue.

The Frontier Mulch Finishers are sold and supported by John Deere, the most trusted name in farm, ranch and lawn equipment. To help you choose the right Frontier Mulch Finisher, talk to your local John Deere dealer, your exclusive source of Frontier Equipment.
