

New 2510L Liquid Fertilizer Applicators

Now sidedress in perfect sync

The complete solution to liquid sidedressing success is now here.

The all-new 2510L Applicators work in perfect sync with a fully integrated John Deere solution system to get the precise liquid fertilizer placement you need.

With the 2510L, you connect directly to John Deere Section Control*, GreenStar™ Rate Controller and GreenStar 3 2630 Display. The results: the most advanced system control, field documentation, map-based prescriptions, and application precision with minimal overlap.

Choose from two models:

- Vertical-Fold with 30- and 40-foot widths.
- Side-Fold with widths of 60 foot.

The perfect fit for your operation.

With a total of 18 spacing and row combinations, the 2510L lets you customize your machine to match your specific operation.

- One of the market's largest tank capacities — up to 2,400 gallons.
- Coulter spacing from 20 to 40 inches.
- A 20-inch coulter with a mounted knife or injector.
- Row options are 12, 16, 24 and 36.

All 2510L models are fully backed by your local John Deere dealer and John Deere FarmSight™ Services to help you optimize machine performance and logistics, and put you in control of the application data to help drive up your profit potential.

** John Deere Section Control activation required. See your dealer for details.*

Choose from **knife** or **injector coulters**. 1. Knife coulter delivers the most efficient application of fertilizer by knifing it directly into the soil with no worries of evaporation. 2. Stainless steel industrial injectors feature no-drip tips to let you apply a solid stream of liquid fertilizer directly behind the coulters for high-precision injection.

Hydraulic wing kick automatically lifts the wings higher than the main toolbar when turning in the field, providing increased clearance to greatly reduce any crop damage.

Single-reach tongue makes it easy to turn tight corners and puts tires in the spacings, not the rows.

A **31-inch crop clearance** lengthens your application period.

2510L Specifications

Model	2510L Vertical-Fold	2510L Vertical-Fold	2510L Side-Fold
Fold type	Vertical-fold	Vertical-fold	Side-fold
Base machine width (ft.)	30	40	60
Allows application when outer wing is folded	No	Yes	Yes
Available row spacing (in.)	30	20, 22, 30, 36, 38 and 40	20, 22 and 30
Number of coulters	11 or 13	11 to 25	23 (30-in. spacing) 25 (30-in. spacing) 25 (20-in., 22-in. spacing) 35 (20-in., 22-in. spacing) 37 (20-in., 22-in. spacing)
Coulter style	20-in. ripple coulter	20-in. ripple coulter	20-in. ripple coulter
Operating frame clearance (in.)	31	31	31
Tank size (gallons)	1050, 1350 or 1800	1050, 1350 or 1800	1800 or 2400
Wing flex	5 degree flex up and 5 degree flex down	5 degree flex up and 5 degree flex down	15-degree up 8-degree down
Gauge wheels	2	2	4
Coulter frame tubing	7 in. x 7 in. single rank	7 in. x 7 in. single rank	5 in. x 7 in. double bar (single on outer wings)
Engine hp required	140-160	160-190	200-220
Fertilizer delivery	Knives or injectors	Knives or injectors	Knives or injectors
Hydraulic down pressure	Yes	Yes	Yes
Hydraulically driven pump	Yes	Yes	Yes
Transport width	14 ft. 0 in.	14 ft. 0 in.	18 ft. 0 in.
Transport height	13 ft. 4 in.	13 ft. 4 in.	9 ft. 6 in. for 1800-gal. tank 10 ft. 5 in. for 2400-gal. tank
Transport length	17 ft. 8 in. for 1050- and 1350-gal. tank 21 ft. 5 in. for 1800-gal. tank	17 ft. 8 in. for 1050- and 1350-gal. tank 21 ft. 5 in. for 1800-gal. tank	21 ft. 5 in.

Now sidedress in perfect sync with the all-new 2510L Liquid Fertilizer Applicators. Ask your John Deere dealer for details.
