Bumpers (front/rear)	Standard/Standard

// FEATURE HIGHLIGHTS

1 REV Gen5 trail platform

A sleek design that brings a whole new level of refinement, performance and good looks to the trails.

2 RAS™ RX front suspension

Conquer every inch of the most challenging trail conditions with unbreakable confidence with race-inspired RAS RX front suspension. Designed specifically for rough trail performance with less chassis roll for unrivaled cornering stability.

3 Rotax 900 ACE Turbo R engine

Now the most powerful 4-stroke engine ever offered. Ferocious instant acceleration and top speed through bigger fuel injectors, increased boost and optimized intake and exhaust systems. The new cable activated iTC throttle better matches a performance rider's profile while offering three driving modes.

RENEGADE X 900 ACE TURBO R SHOWN

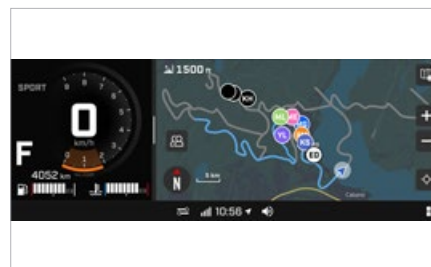

4 rMotion™ X rear suspension

Built upon the same principles rMotion™ suspensions are renowned for, and then some. Completely redesigned for unmatched big bump absorption and incredible comfort. Longer front arm with exclusive adjustable angle design ideally mates with RAS™ X front suspension creating superior cornering on-trail.

5 Heated trail seat

Narrow at the front for easier rider movement during aggressive rides. Wider and flat at the back for improved comfort over long hauls. Heated for the coldest days.

6 10.25 in. Touchscreen Display with BRP Connect, featuring Built-In GPS with Group Ride

View the live location of members of your group while independently seeing other riders around, without the need for a phone connection or cellular network access. Benefit from a map layer and trails,* track your current ride and see previous. For more, use your phone with the free BRP GO! app.
