

**THE "V" IS FOR VERSATILITY.**

Each horizontally reinforced, steel backed poly section, comes with a double-acting 1 1/2" x 9" ram. The **Arctic HDVTE-P** full-grip joystick puts unprecedented control in the palm of your hand. Winter can visit, but it does so on your terms. Built for full-size vehicles and larger.

**4 LASER-CUT, STEEL VERTICAL RIBS, AND 3 HORIZONTAL SUPPORTS**

on each wing, back our frictionless poly moldboards with the strength of steel

**HOT-DIPPED GALVANIZED STEEL FRAME**

provides added resistance to abrasion, water and rust, making our plows virtually maintenance free

**DOUBLE LIFT CHAINS**

for extra lift strength and safety

**3/8" POLYETHYLENE MOLDBOARD**

throws snow further and faster resulting in less resistance and vehicle wear, and improved fuel economy

**A 1 3/16" X 23 1/2" GREASEABLE KINGPIN**

with a reinforced pin housing comprised of seven 2 1/2" x 5/8" wall bushings, provides tremendous strength

**6" DEFLECTOR**

keeps snow down on the blade and away from the driver's windshield

**LASER-CUT HOLES**

for optional bolt on wing kits

**9" STROKE, DOUBLE-ACTING CYLINDERS**

enable a full blade angle of 30 degrees in "V" and scoop position

**1/2" X 6" HARDENED, HIGH CARBON STEEL CUTTING EDGE**

with top hole bolt pattern

**QUIK\*LINK® IV ATTACHMENT**

**FLARE KIT**

**QUIK\*LINK® III ATTACHMENT**

## WHY CHOOSE POLY?

Arctic's high density polyethylene moldboards combine the durable, slick characteristics of poly with advanced blade design mechanics to throw more of even the stickiest, wettest snow further and faster. This not only results in more snow being moved more quickly, it also minimizes forward resistance – meaning decreased wear on power trains and increased fuel economy. **Contact your Arctic Dealer to learn more about the high-tech, low-maintenance benefits of poly.**

### M3500V SERIES HYDRAULIC POWER UNIT

The M3500V power unit has been designed around the proven M3593. The valve block has been changed to a 7 valve configuration to drive the double acting wing rams. This unit offers one of the highest power outputs in the industry, which means faster operation and less wear on the battery. Standard operating pressure is 1500 psi. Four crossover relief valves are set at 3000 psi.

### QUIK\*LINK® III & IV MOUNTING KIT

Featuring an adjustable jack stand, our mounting systems allow you to remove the entire plow assembly as a single unit with the lift frame intact. Arctic's QUIK\*LINK® III & IV system makes the already-simple mounting system even easier to use by replacing the two mounting pins with a simple single, spring-loaded locking bar.

## ARCTIC HDVTE-P SPECIFICATIONS

Plow Name	HDVTE96-P	HDVTE108-P
Length	96"	108"
Moldboard Height	29"	29"
Material	3/8" Poly	3/8" Poly
Plowing Width (Full Angle)	83"	94"
Complete Weight	*827 lbs	*866 lbs
Mounting Type	Detachable	Detachable
Removable Lights and Power Unit	Yes	Yes

## STANDARD CONTROLLER

### HAND HELD

This ergonomic controller has rubber faced buttons, and a float light in the middle. An automatic shut-off eliminates accidental use or drained batteries.

## MPX WIRING

### MODULE CONTROL SYSTEM

Easier installation, Universal Wiring Harness and Control Module to allow the use of different Arctic Snowplows simply by changing controllers. (note (\*) Vehicles and plows must be MPX system compatible). Required for most newer vehicles.

\* Weight does not include frame mounting kit

## OPTIONAL ACCESSORIES

SINGLE HALOGEN BULB  
(H9003)

DUAL HALOGEN BULB  
(H7, H1)

CURB GUARD

EXTEND. BL. GUIDES

LICENSE PLATE BRACKET

3RD SPRING KIT

FLARE KIT

QUIK\*LINK® is a registered trade-mark of Arctic Equipment Manufacturing Corporation.
