Cast Closing Wheels

New cast closing wheels are set at 12° camber and can be set to 0°, 2°, or 4° caster to meet trench closing needs.

Whether you plant flat or on beds, the 2025A and 2525A give you the best of both worlds: the box capacity of a drill and the precision seed singulation and placement of a planter. Air-Pro® metering coupled with Clear-Shot® Seed Tubes will plant a wide variety of seeds including corn, soybeans, milo, and cotton. Heavy-duty straddle axle gauge wheels are easily adjusted from planting flat to running on beds.

Features & Benefits

6" HYDRAULIC FAN - Provides air pressure to each Air-Pro® Meter.

SENSORS - Internal meter pressure is constantly measured and adjusted automatically to deliver unmatched seed singulation.

TUNED MANIFOLDS - Each Air-Pro® Planter is engineered to include a tuned manifold and tested to ensure the same amount of air is supplied to each row unit.

SPRING-LOADED CONTACT GROUND DRIVE - Allows the drive wheel to absorb undulations in the field to maintain consistent drive speed.
