

WEAVERLINE

HIBOX

All Stainless Conveyor system

- Stainless gap-link chain
- Stainless steel sprockets
- Stainless steel slats

FAST FEEDING

High output—smooth-running discharge auger and fast apron speed cuts feeding time. Unload a 30 bushel cart full of corn silage in 35 seconds.

EASY FEEDING

Hydrostatic drive—one hand fingertip control lets you select any traveling speed in either forward or reverse.

High Discharge Box—13" to 30" discharge height for feeding into high mangers. Standard overall height of the cart is 51" with a discharge height of 12". Any additional inches added to discharge height will add to the overall height as well. All Hibox carts are special order and discharge height must be specified with order.
