

**Titan Trailers  
Custom Built For**

# Aggregates

Aggregate V-Floor® *WALKING FLOOR*®  
equipped trailer

48' V-Floor

End Dump

- Moving Floor Trailers
- “Extreme-duty” Trailers
- Tipper Trailers
- Semi-Dump Trailers
- Tub Dump Trailers
- Trains

**More payload • Lower fuel cost • Longer life**

- Original THINWALL™ body construction
- Full range of models to 53 ft.
- Custom axle configurations: tandem, lift-axle, multi-axle, Paramax®
- Customize to your application: drum & hub assembly, suspensions, tires, rims, landing gear, plus other specifications

*Strength Through Innovation*

# Custom built for the business you're in

From our famous THINWALL™ moving floor trailers and tippers to our innovative semi-dumps, tub dumps and “extreme-duty” models, Titan trailers are renowned for long lasting strength in the most demanding jobs. But our real strength is custom-designing and building the right trailer to help your business drive for the bottom line.

Only the original THINWALL gives you the patented end-to-end strength of double-welded double-wall extruded aluminum.

Titan THINWALL is the only aluminum smoothside that's 100% machine welded from end to end, inside and out. Full-length horizontal welds allow better flexing over rough terrain. The hollow-core ribs reduce inside punctures and virtually eliminate exterior sidewall damage.

THINWALL 48' V-Floor

## More uptime

- protective LED light housings
- stainless steel hydraulic lines
- “service-friendly” undercarriage
- stainless steel and anti-rust fasteners

## More pay per payload

- 10% more cubic capacity
- patented aluminum coupler reduces weight by 300 lbs.
- smoothside and light weight horizontal panels save 15% of fuel costs

## Tub Dump

The first rear-dump body built with exclusive rolled THINWALL hollow-core aluminum panels, Titan tub dumps achieve superior visibility and load stability compared to traditional semi-dumps.

## More years

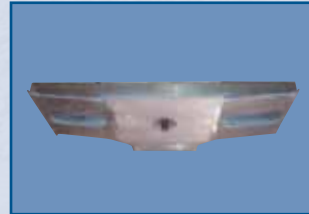

- 6061-T6 extrusion-grade aluminum body
- crossmembers interlocked and welded into side panels
- one-piece front gusset
- bimetal joint at 5<sup>th</sup> wheel eliminates corrosion
- stainless steel liner with anti-corrosive protection between suspension and main frame
- double-wall side panels

V-Floor® unloader systems resist “extreme duty” loads with overlapping steel slats or new lighter weight V-18 aluminum slats.

Heavy-duty top rails are sloped for shedding and provide the extra strength to stand up to side-loading impacts and stresses.

Patented aluminum coupler reduces weight by 300 lbs. for more payload and fuel efficiency without sacrificing strength.

Streamlined V-Floor body weighs less to load more; improves stability and saves fuel with reduced wind resistance.

## Customer driven:

**Front access door** allows easier servicing and viewing access of trailer interior while unloading.

**Lift-up shedder** for simple clean-out.

**V-Plow** automatically cleans material out of V-Floor trailer as the load walks off.

**“Flow-through” tailgate** reduces drag on Titan tippers to cut down on fuel costs.

**Axle configurations** matched to local load regulations; steering axles and multi-axle trailers available.

Titan uses KEITH® WALKING FLOOR® self-unloader systems.

**Service-friendly undercarriage** simplifies access and maximizes workspace for routine maintenance.
