LAKER

We're proud to introduce a new series of heavy duty fishing boats that are based on our classic hull design that has been seen on the water for decades. With the 3672 and 3673 we definitely made a good thing even better. We widened the beam on this legend to a full 74" wide to gain the needed elbow room desired by anglers today. Additionally we increased the bow depth and included much stronger gunwales. A number of options are available to improve your time on the water as well. The end result is a fishing boat that can withstand the rigors of day-in and day-out use. These two models are true workhorses and we didn't forget the performance as they are rated for 40HP and are design to carry a full 1250 lbs.
