PROUDLY CANADIAN AND ENJOYED WORLDWIDE

www.campionboats.com

Our forty years of boat building experience are crafted into every Campion. Our family based business stretches far beyond our home waters as our boats ply waters worldwide.

WE CARE ABOUT OUR ENVIRONMENT

www.campionboats.com

At Campion Marine, we are committed to reducing our environmental footprint, while maintaining our dedication to building top quality, high-performance boats. It is the choices we make today that will ensure we leave a lasting legacy for our children tomorrow.

Campion

MEMORABLE

QUALITY

www.campionboats.com

Quality is a 'degree of excellence'. It is the ongoing process of continuous improvement. Our boats are a testament to our commitment to providing the best quality in every vessel we build.

Campion

EXCEPTIONAL

www.campionboats.com

We want this to be your experience. We think about every thing when it comes to styling, functionality, performance and materials – all of it carefully balanced and planned.

CAMPION'S BIG 5

F.I.S.T. STRINGER SYSTEM

The Fibreglass Integrated Stringer Technology system allows for larger bonding areas than the conventional stringer system. It allows the bulkheads and floors to be bonded directly to the stringer system, reducing hull flex, improving strength, speed and fuel efficiency by up to 10%.

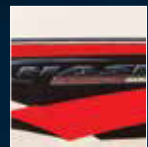

3 DIMENSIONAL WEAVE FIBERGLASS AND KEVLAR REINFORCEMENT

This is the most technologically advanced fiberglass mat available on the market today. 3D Weave requires less resin for saturation, creating a lighter, stronger hull that requires fewer layers to obtain the desired mill thickness and reducing the chances of de-lamination. Campion is committed to your family's safety and with this in mind, a layer of Kevlar is built into our hulls at the keel.

FUEL EFFICIENT APEX HULL DESIGN

Campion's industry leading Apex hull has redefined bottom design. Our award winning design technology expands the high pressure zones on the boat for faster planing and a more stable platform at high speeds.

IN-GEL GRAPHICS

Campion uses the highest quality gel coats in the marine industry. Our gel coats are tested biannually against all extreme weather and environmental conditions. Campion gel coat graphics and feature stripes are painstakingly laid out by hand and sprayed right into the mold.

WE CARE

At Campion Marine, we are committed to reducing our environmental footprint, while maintaining our dedication to building top quality, high-performance boats. We are a lean manufacturer who continuously seeks out ways to reduce waste and work with suppliers to provide more environmentally sustainable products.
