HI-CAPACITY BI-FOLD™ WHEEL RAKES

12 - 14 - 16 WHEEL HI-CAPACITY

The H&S Hi-Capacity bi-fold rakes have the raking wheels positioned ahead of the rake arms, main frame beams and transport wheels. Coupled with a high and wide end of frame there are no hangup points or restrictions when raking the heaviest of hay crops.

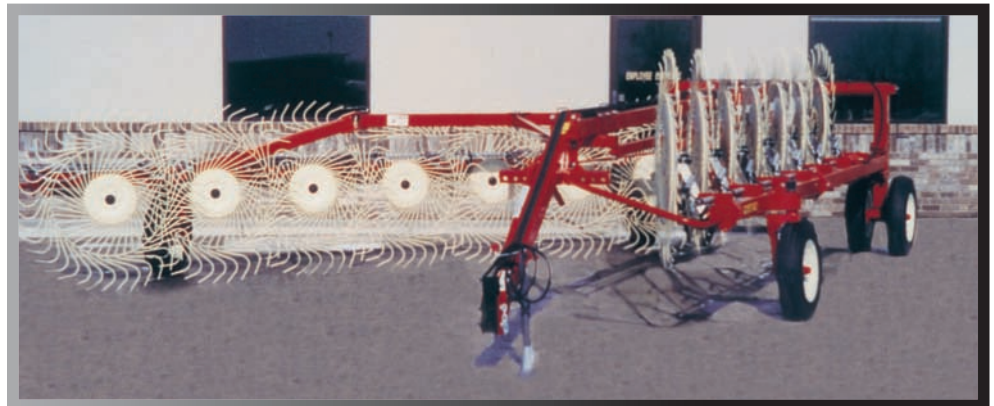

The rake arms on the 14 and 16 wheel hi-capacity rakes feature **2 roller bearings** (see photo) on each end of the arm for long life, smooth operation and less wear than rakes with bushings.

H&S Hi-Capacity rakes **fold up to 8'6" or less** with the touch of a lever for road transport or to go through gates.

Limited oscillating offset tandem transport wheels assure a smooth, level ride, even over irrigation tracks. **Standard** on the 14 & 16 wheel Hi-Capacity, **optional** on the 12 wheel Hi-Capacity.

The Hi-Capacity rake can be configured as both a v-rake or with the right side open as a trailer rake.

H & S MAKES F

CITY™ BI-FOLD WHEEL RAKES

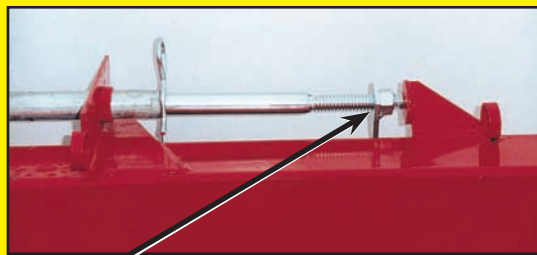

The Hi-Capacity rake opens and closes hydraulically, rake wheels are lowered and raised hydraulically, and the rake wheels float independently.

**BUILT WITH
QUALITY!
STRONG AND
DEPENDABLE**

The high open, adjustable rear frame allows for the heaviest crop to pass through. Windrow width adjustment is done with a hand crank.

ADJUSTABLE GROUND PRESSURE

The adjustment for the ground pressure on the rake wheels allows the operator to fine tune the 12, 14 and 16 wheel Hi-Capacity rakes to fit varying conditions.

ADJUSTABLE BRAKE BAND

An adjustable brake band on top of the front spindle keeps the front gauge wheels from spinning in rough conditions.

FAST WORK OF RAKING HAY

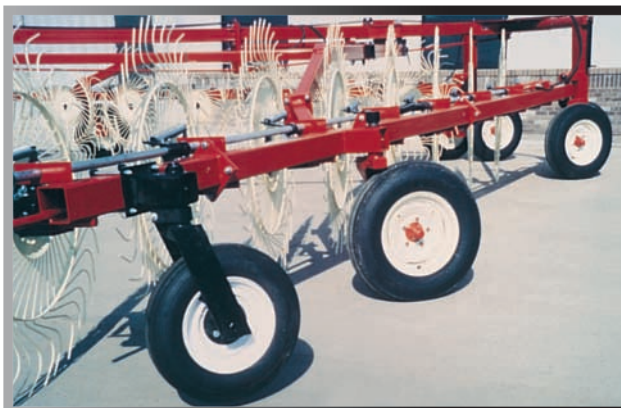

Specifications

NUMBER OF WHEELS	12	14	16
WHEEL DIAMETER	55"	55"	55"
