An automatic oiler system oils the drive system chains anytime the discharge door is raised. Optional on the **5115**.

A scraper holder is standard equipment.

Jack storage is on the left side of the manure spreader.

The heavy-duty expeller system with a quick release poly-lined fine spread pan and side fins help cut the drift of material towards the tractor and spreader, and provide an excellent spread pattern.

The manual adjust top expeller shield sets the distance of the spread pattern, while the hydraulic cylinder allows adjustment for rate of application.

Reversible bolt-on square tooth paddles shred and rip material with a "Top Shot" action for an even spread pattern.
