PRODUCT OVERVIEW

- › Rear attach for use on acreages, farms and municipalities
- › Category I, II & III
- › 15 - 225 hp required

FEATURES

- › Spout rotator and deflector available as manual or hydraulic
- › Standard shear bolts on all PTOs

OPTIONS

- › Commercial and truck loader chute, model 1080 and 1200

SNOWBLOWER

5010, 6010, 6610, 7420, 8420, 9620, 1080, 1200

Spout Deflector

The spout deflector can be equipped with a hydraulic cylinder kit or a 6-position manual adjustment.

Hitch

Most models feature an adjustable hitch that is designed to adapt to 3-point hitches of varying lengths and heights, which reduces stress on the PTO shaft.

Gearbox

The oil bath gearbox, available on 84", 96", 108" and 1200 models, adds longevity.

Fan

A 4-blade fan is standard on all models. Dual augers are standard on model widths 96" to 120".

Spout Rotator

The spout rotator is available with manual or hydraulic positioning.

Skid Shoes

Adjustable/replaceable skid shoes are standard on all models.

Allied has been building reliable snowblowers for more than three decades. Through the years the design has been refined to create an excellent snowblower that is easy to use and maintain. PTO-driven Allied snowblowers attach to 3-point hitch and are available in widths ranging from 50" to 120".

[1] #50, #60 or #80 sized chain dependant on model **[2]** Adjustable and replaceable skid shoes are standard equipment. **[3]** Dual augers **[4]** 7 foot commercial and 10 foot truck loading chutes are optional on the 1080 and 1200 models.

HYDRAULIC DRIVE SNOWBLOWER

Models 6025, 7225, 7235, 8425, 8435

Hydraulic Motor Chain Drive Assembly

With a hood turning range of 270° Allied by Farm King Hydraulic Drive Snowblowers give you superior control when moving snow.

Wiring Harness

The Allied by Farm King Hydraulic Drive Snowblower series have a wiring harness to fit almost any brand on the market. Compatibility available with: Bobcat 14, pin ASV, Cat "B / C / D" series 8 pin, Case / New Holland 14 pin and John Deere 14 pin. A magnetic cab mounted control box is available on all other models.

Hydraulic Motors

Allied by Farm King Hydraulic Drive Snowblowers have hydraulic motors mounted directly on the fan and auger shaft eliminating couplers and chain drive assemblies for simplicity and ease of maintenance. A hydraulic relief replaces traditional shear pin technology for increased productivity and reduced downtime.

The Allied by Farm King hydraulic drive snowblowers have been engineered to maximize your skid steers efficiency. Available in high and standard flow configurations, Allied by Farm King blowers will connect with any modern skid steer. Designed to be durable and reliable, Allied by Farm King products are the best choice for industrial and commercial snow removal.

[1] Hydraulic motor chain drive. **[2]** Wiring harness fits most skid steer brands. **[3]** A hydraulic motor mounts directly on the fan and auger shaft eliminating couplers and chain drive assembly.

PRODUCT OVERVIEW

- › One of the highest measured tip speeds in the industry creates powerful suction for a clean cut
- › 35 to 50 hp required

FEATURES

- › Slide adjustment on the gearbox for easy belt tensioning
- › Blade overlap of 1-5/8" to 2-5/8" minimizes stripping
- › Standard pneumatic tires with puncture proof sealant
- › Hard surface cutting edges are standard on all models

OPTIONS

- › 2-5/16" ball hitch

TRIPLEX FINISHING MOWER

Models 450, 550, 650 and 750

Transport

The Triplex Finishing Mower is designed to be transported with ease. A cast clevis hitch is standard and a 2-5/16" ball hitch is optional for road transport. The 5-position hitch adjustment makes it easy to move, regardless of the hitch height of the tow vehicle. The decks are lifted into position by hydraulic cylinders and are automatically locked in place for transport. The decks are unlocked right from the tractor seat using a cable, or can be released using the optional hydraulic system.

Roller Bearings

Tapered roller bearings in the wheel hubs ensure long-term reliability without needing frequent lubrication. The standard front UHMW roller prevents scalping on uneven turf.

Blade Overlap

There is a 1-5/8" blade overlap on the 450, while all the other models have a 2-5/8" blade overlap. This overlap helps to prevent stripping, especially when turning.

Yoke Design

A forgiving yoke design creates the ability to follow the terrain, yet maintain a seamless finish, available on models 550 and 650.

Wheels

The model 750 has four wheels on each of the three decks. Models 650 and 550 have four wheels on the wing decks and two on the center deck. The 450 has three wheels on the wing decks and two on the center deck.

Allied by Farm King has been making finishing mowers for more than 15 years. Three of these finishing mowers together create one magnificent volume grass trimmer: the Triplex Finishing Mower. Nine blades generate a powerful vacuum for a crisp, clean cut. Each deck floats independently over rolling terrain for a uniform, manicured trim.

[1] Heavy-duty deck and structural supports have solid reinforcing rods around the edges. **[2]** Adjustable poly roller to prevent scalping. **[3]** Each wheel assembly includes a cutting height adjustment on the 1-1/4 inch wheel yoke shaft. **[4]** Transport position.

STUMP GRINDER

Skid Steer and 3-Point Mount

PRODUCT OVERVIEW

- › Constructed for fast and easy stump removal
- › Category I, II and Universal skid steer
- › 15 - 45 hp required

FEATURES

- › Carbide-tipped cutting teeth
- › 5 – 8 inches of cutting depth
- › Rubber chip deflector
- › 3/4 inch cutting wheel thickness
- › Easily accessible grease fittings

The Allied by Farm King stump grinder can cut through even the hardest stumps. The impressive 45 degree swing arc allows the stump grinder to cover greater surface areas of larger trees. The grinder is easily controlled using the tractor or skid steer hydraulic levers. Both 3-point hitch grinder models use a slip clutch with the skid steer unit using system pressure.

BRUSH GRAPPLE

Models 6254, 7764

PRODUCT OVERVIEW

- › Constructed for picking up brush and other debris
- › Available in widths of 62 and 77 inches
- › 95 - 150 hp required

FEATURES

- › Reinforced tubes between lower tines
- › Serrated upper tines
- › Pivot Pin designed with tight tolerances
- › Hardened steel construction

OPTIONS

- › Available in skid steer or tractor mounting configurations

The large 50 inch grapple opening allows the operator to pick large quantities of branches at one time. Two 2500 psi cylinders squeeze any kind of brush quickly and easily. Simply mount the Allied brush grapple to the front of any loader for increased versatility.

[1] Tine points are designed to go under logs and brush, leaving nothing on the ground. **[2]** Replaceable weld-on tine points.

ROTARY SWEEP

3-Point and Skid Steer Mount

PRODUCT OVERVIEW

- › For use in municipalities, farms, construction sites and airports; built to remove dirt, sand, gravel and trash
- › Category I and skid steer
- › Broom angles up to 30 degrees right or left

FEATURES

- › Large brush diameter of 32 inches
- › Double gearbox drive

OPTIONS

- › Sprinkler system for dust control / Dirt deflector

The Allied by Farm King rotary sweep cuts cleaning jobs in half with a rugged and durable design. The rotary sweep is available in 5 to 7 foot sweeping widths, making sure no surface goes untouched. Rear mounted for tractors and front mounted for skid steers allows the Allied rotary sweep to easily be maneuvered around obstacles.

[1] Poly or a combination of poly and wire brushes is available. [2] Quick attach skid steer mounts for easy hook up.

SNOW BLADE

Skid Steer and Euro Mount

PRODUCT OVERVIEW

- › Constructed for residential and commercial snow removal
- › 25 - 80 hp recommended horsepower

FEATURES

- › 10 gauge blade thickness
- › 7 and 9 foot models have 5 degree oscillation
- › 2 extension trip springs

OPTIONS

- › Hydraulic angle kit
- › Crossover release valve

The extremely versatile Allied by Farm King snow blade can come equipped for a front end loader or skid steer configuration. The snow blade is constructed using 3/8 inch by 6 inch cutting blade. Furthermore, the cutting edge is reversible to extend the overall life of the blade. At each end of the blade are adjustable skid shoes for a precise blading depth.

[1] Dual acting cylinder hydraulics provide hands free angle adjustment. **[2]** The 5 degrees of oscillation allows the blade to contact uneven surfaces.

REAR BLADES

Series 30, 45, 60, 80, 100, 150

Precision Engineered

These rear blades have been precisely built, with particular attention to the pivot point. To minimize metal-on-metal wear and maximize blade longevity, the pivot point has been designed with tight tolerance and built to those specifications.

Adjustment

The manual tilt adjustment on the 45 Series tilts the blade up to 15°. The same bolts adjust the sideshift feature to move the blade up to 12" off-center. Tilt on the 30 and 60 Series is adjusted on the 3-point hitch.

Cutting Edge

Allied by Farm King rear blades feature a reversible and replaceable cutting edge.

Standard Equipment

Allied Rear Blades are quick hitch compatible and the parking stand is standard equipment.

Allied by Farm King has been building a wide variety of rear blades for several decades. These blades are manufactured using more steel, which adds strength, longevity and durability to each blade. Available in five series suitable for tractors ranging from 15 hp to 150 hp, Allied by Farm King Rear Blades are capable of tackling tough scraping projects.

[1] Manual or hydraulic offset adjustment is available on 80 Series and larger. **[2]** Adjusting the angle on models without hydraulic cylinders does not require tools. **[3,4]** The manual tilt adjustment on the 45 Series tilts the blade up to 15°. The same bolts adjust the sideshift feature.

Series 30

For tractors 15 to 30 hp - available in 4', 5' and 6' widths. Manual adjustment. Tilt adjustment is 3-point hitch linkage adjustment.

SERIES	30
3-point hitch	Cat. I
Angle	30° left or right
Angle - forward	5-position
Angle - reverse	5-position

Series 45

For tractors 20 to 45 hp - available in 5', 6' or 7' widths. 15° vertical tilt on both sides. Cutting edge constructed of high carbon steel, 1/2" x 6".

SERIES	45
3-point hitch	Cat. I
Angle	40° left or right
Angle - forward	5-position
Angle - reverse	5-position

Series 60

For tractors 30 to 60 hp - available in 7' and 8' widths. Mechanical linkage. Hydraulic adjustment is optional. Cutting edge constructed of high carbon steel, 1/2" x 6".

SERIES	60
3-point hitch	Cat. II, I optional
Angle	40° left or right
Angle - forward	5-position
Angle - reverse	5-position

Series 80

For tractors 80 hp - available in 7', 8' and 9' widths. Angle adjustment, offset and tilt can be fitted with either hydraulic cylinders or mechanical linkage.

SERIES	80
3-point hitch	Cat. II
Angle	30° left or right
Angle - forward	5-position
Angle - reverse	5-position

Series 100

For tractors 100 hp - available in 8' and 9' widths. Hydraulic angle adjustment, offset and tilt. Cutting edge constructed of high carbon steel, 1/2" x 6".

SERIES	100
3-point hitch	Cat. II and III
Angle	30° left or right
Angle - forward	5-position

3-point hitch	Cat. II and III
Angle	30° left or right
Angle - forward	5-position
Angle - reverse	5-position

The best part about owning a tractor is putting it to good use. Regardless of the size of your tractor, a number of implements are available to maximize the usefulness of your machine. Whether you have a compact utility tractor or a large four-wheel-drive, the quick hitch can be matched to various types of mowers, tillers, rear blades, box scrapers, cultivators and rakes to turn any tractor into a multi-purpose farming tool.
