

THE BALEMOVER

ADVANTAGE

Highline makes picking bales a breeze and offers non-stop picking and transporting. Unloading can be done without ever leaving the cab and with Highline's ingenuity built into every balemover, you can expect faster bale hauling with only one tractor and operator.

Features

- Highline offers non-stop picking and transporting with only one tractor and operator
- Standard 90 degree turn bale fork
- Each side of the 1400 is controlled independently so you can fill one side before filling the other or fill randomly and out of sequence on each side
- Chain rails are easily adjustable to match different bale sizes

- In-cab electric over hydraulic controls give full hydraulic control with only two hydraulic outlets on your tractor
- Undercarriage that walks both side to side and front to back

Chain Rails

Chain rails are easily adjustable to match different bale sizes. Chains are sloped and factory ground to conform to the slope of round bales, eliminating the needs for cleats and reducing broken strings.

A hydraulic motor controls the chains and eliminates gearboxes, bearings and shafts and allows the independent operation of either row of chains on the Balemover 1400.

Unload Without Ever Leaving The Tractor

Back the Highline Balemover where you want the bales, tilt the bed, engage the conveyor chains and drive slowly forward. Bales are stored in a long, straight row to minimize weathering damage and leaves a one-foot gap between the two rows.

Picking forks

are easily adjustable to accommodate a variety of round bales.

The Balemover 1400

has a standard 90 degree turn bale fork to automatically turn bales for non-stop loading from virtually any angle.

Easy to use, in cab hydraulic controls give full hydraulic control with only two hydraulic outlets on your tractor. Hydraulic valves have high capacities to match the high flow rates of new tractors.

Printed in Canada.

BALEMOVER 1400
FEATURES AND SPECIFICATIONS

Configuration	Double row
Horsepower required	90 HP
Hydraulic outlets required	2
Capacity	14 - 5' bales
Tires	Eight 11L x 15, 12 ply rating; GVW 38,000 lbs
Bed length	37'
Overall length	43' 4"
Transport width	16.75'
Shipping weight	9660 lbs
Drawbar weight	1740 lbs
