ART'S WAY
artsway-ag.com

Take full control of the box.

Are you a mid-sized operation looking for a straightforward, no-fuss forage box? The Art's Way 2100 Series forage box was built to speed up unload times with a fast, hydraulic drive system which allows you to switch from front unload to rear unload with the push of a button right from the cab. We believe a quality forage box doesn't have to be loaded with unnecessary bells and whistles to get the job done. What you need is a low-maintenance forage box with durable components and the ultimate versatility with running gear and truck-mount compatible frame. **This simple, serviceable and affordable forage box will keep your cow candy rolling for years to come.**

Product highlights:

- ▶ One in-cab button, hydraulic drive system to switch from rear unload to front unload
- ▶ User-friendly, independent controls
- ▶ 16-, 18- and 20-ft. high-capacity box length options
- ▶ 1/2-in. thick and slick densilite flooring for reduced thermal expansion and minimal wear
- ▶ Streamlined components for improved serviceability and lower replacement costs
- ▶ 4-minute front unload
- ▶ 1-minute rear unload
- ▶ Running gear and truck-mount compatible frame
- ▶ 10 floor speed options

Lightning-fast unload

Our independently controlled hydraulic drive system sets us apart from the others in speed and convenience. Our rear- and front-unload options can be done right from the cab with the switch of a button clocking in at 1-minute and 4-minutes to unload respectively.

Robust capacity

Pick the box size fit for you — 16-, 18- or 20-ft. — with corrugated-steel sides ready to take on the acidic environment of forage harvest.

No-fuss engineering for easier maintenance

We've drastically reduced the number of unique parts on this machine. These streamlined components translate to a simple, low-maintenance forage box that just about anyone can service.

Durable floors

The box floors are constructed with tough 1/2-in. thick densilite material for reduced thermal expansion (no waves and buckles here) and minimal wear. These floors provide a slick surface for material to slide across to reduce trapped moisture buildup.

Options

In-cab hydraulic controls

Our all new in-cab hydraulic controls allow you to run your forage box without leaving the seat of your tractor. This option allows you to change from front unload to rear unload with a push of a button.

Side extension/ 4th beater kit

You have the ability to add extensions, making your box taller which includes a 4th beater for more material movement. With extensions you could add up to 187 cu. ft. of material (See specifications sheet on page 4.)

Art said it best: "A good Forage Box should knock your socks off as you sit back in the cab and unload from the front or rear at near racing speeds. 4-minutes or 1-minute to be exact."

Art's Way: How Work Gets Done.
