

LD TINE 900

AGRONOMIC ASSET SOLUTION

LD tine 900

Agronomic asset solution

LD tine 900 for subsoiler.

LD design
(Low disturbance)
has been developed
to ensure the best
possible subsoiling
agronomic result.

MIG point

Specific angle

- The wing angle helps to lift the soil even in very dry conditions reduce the natural resistance for less power requirements.

Better long life of the wearing part

- Ensure a complete working width whatever the level of wear on the wings.

Long life

- Carbide protection (option)
- Carbide wings (option)

Improve the structure

Low surface disturbance to remove compaction

Drainage improved

Help air flow through the soil

Help the roots development, which helps the crop growth

LD tine leg is straight and symmetrical, which makes it possible to lift equally the soil across the working width.

The symmetry ensures movement across the working width to avoid an over lapping pass.

The new tine is suitable on Heliplow (single frame) and Helios range (Double frame)
