Power Equipment Brochure

**POWERED BY
CLEAN FUEL.**

GRAVELY® LP Series

Throughout the history of Gravely, we have focused on developing products specifically for the needs of our commercial customers. The insightful engineering and quality found in our gasoline-powered equipment is expanding to a complete line of products powered by Liquefied Petroleum Gas, more familiarly known as propane or LP.

Our LP lineup is engineered and built by the same experts who created the Pro-Turn, Pro-Stance, and Pro-Walk gasoline models, which means they come with the same features our customers demand. Not only is design integrity maintained from platform to platform, but LP offers numerous user benefits. For starters, **LP fuel is 20 to 30 percent less expensive** than current gasoline prices, and it burns cleaner – a HUGE draw to customers who hire lawn care professionals based on their environmental record.

FULL LINEUP

Gravely understands that different contractors have different needs, which is why our factory built 2015 LP lineup includes Pro-Turn 400, and the **NEW Pro-Stance 52 LP and Pro-Walk 48 LP** models. Gravely is giving your business huge fuel \$avings . As if that wasn't enough, these NEW units come equipped with Kohler® EFI engines that provide unmatched efficiency, leading to a reduced "payback" time.

ULTIMATE SAVINGS

Propane fuel costs less per gallon than gasoline and requires less engine maintenance, saving money year after year. Propane is a green burning, environmentally friendly fuel alternative that is not considered a greenhouse gas.

ULTIMATE CONVENIENCE

Lawn and garden propane cylinders are specifically designed for mowers indicated by the green ring at the top. These tanks are left-hand threaded to ensure you always have the correct tank for the job.

ULTIMATE RUN TIME

Gravely Pro-Turn 400 LP mowers have two 33.5 lb. propane tanks providing longer run time and enough fuel to complete large jobs.

COMMERCIAL DUTY
TOUGH POWERED BY **CLEAN FUEL**

Check out the list below for more reasons Gravely's LP products should be part of your fleet:

- LP-powered engines last longer because the fuel burns cleaner
- No spilling during fill-ups (unlike gasoline)
- Less chance of supply shortages due to theft (employees can't "borrow" LP to run their trucks)
- 97% of propane is produced in the United States
- Ethanol is removed from the equation, reducing problems and repairs after storage
- All Gravely LP equipment is compatible with 33.5 lb. tanks, for long run-time

LP CONVERSION

Looking for something different than what we produce in our factory? Our authorized LP conversion dealers are trained and certified to convert the fuel source on any Kawasaki engine from gasoline to LP. The custom-crafted tank brackets on these conversion kits are the same parts installed on factory-built units to ensure your converted unit maintains its professional look.

When profits fly out the window from increasing maintenance and fuel expenses, it makes sense to invest in a unit that cuts costs on both fronts. **Building an LP-powered fleet also makes your pocketbook eligible for up to \$1000 per-unit incentive for each new LP unit purchased, courtesy of The Propane Education Resource Council (PERC).** To learn more about the **PERC** program and the benefits of propane, visit: www.propane.com
