

Art's Way

Since 1956

V-Wing Ditcher Pull type or 3 pt. Hitch

Take control of soil management Art's Way.

- Create smooth waterways around fields for irrigation.
- Improve existing sub-surface tile drainage and manage soil nutrients.
 - Contouring your fields to control water flow and erosion can result in a major economic increase.
- Designed to cut through most types of soil and ground cover, the Art's Way Ditcher creates a v-shaped ditch using hardened steel cutting edges. The cutting point and the wings are replaceable for easy maintenance.

Art's Way is the way to manage soil and land conservation.
