

**WINTER DOESN'T PLAY  
NICE, WHY SHOULD YOU?**

Built for full-size vehicles, the Arctic HD-P is the workhorse of the fleet. This popular plow, like all of our poly plows, uses a combination of slick polyethylene skin and advanced blade design mechanics to initiate a rolling motion that throws even the stickiest, wettest snow faster and further. Decreased resistance means less wear on your vehicle's power train and increased fuel economy.

**7 LASER-CUT, STEEL  
REINFORCING RIBS**

back our frictionless poly moldboard with the strength of steel

**4 TENSION SPRINGS**

keep the blade upright and offer ample room for addition of a shock absorber kit, if desired

**QUIK\*LINK® IV  
ATTACHMENT**

**HOT-DIPPED  
GALVANIZED  
STEEL FRAME**

provides added resistance to abrasion, water and rust, making our plows virtually maintenance free

**QUIK\*LINK® III  
ATTACHMENT**

**THREE 3/4" OPEN PINS**

secure the blade to the quadrant and A-frame assembly, eliminating pin seizure, and easing pin replacement

**3/8" POLYETHYLENE MOLDBOARD**

throws snow further and faster resulting in less resistance and vehicle wear, and improved fuel economy

**6" DEFLECTOR**

keeps snow down on the blade and away from the driver's windshield

**HARDENED HIGH  
CARBON STEEL  
CUTTING EDGE**

with top hole bolt pattern

**DISH-SHAPED SKID SHOES**  
improve surface clearance while plowing forward

### WHY CHOOSE POLY?

Arctic's high density polyethylene moldboards combine the durable, slick characteristics of poly with advanced blade design mechanics to throw more of even the stickiest, wettest snow further and faster. This not only results in more snow being moved more quickly, it also minimizes forward resistance – meaning decreased wear on power trains and increased fuel economy. **Contact your Arctic Dealer to learn more about the high-tech, low-maintenance benefits of poly.**

#### M3493 SERIES HYDRAULIC POWER UNIT

The M3493 electric hydraulic system, with a 1.5" x 6" lift cylinder offers proven performance and reliability in a compact size. This unit was built for the low mount lift frame and has an operating pressure of 2000 psi and the crossover relief valves are set at 3000 psi. This pump is compatible with all our control systems.

#### QUIK\*LINK® III & IV MOUNTING KIT

Featuring an adjustable jack stand, our mounting systems allow you to remove the entire plow assembly as a single unit with the lift frame intact. Arctic's QUIK\*LINK® III & IV system makes the already-simple mounting system even easier to use by replacing the two mounting pins with a simple single, spring-loaded locking bar.

#### HAND HELD

This ergonomic controller has 4 rubber faced buttons, and a float light in the middle. An automatic shut-off eliminates accidental use or drained batteries.

#### STANDARD CONTROLLER

#### MPX WIRING

#### MODULE CONTROL SYSTEM

Easier installation, Universal Wiring Harness and Control Module to allow the use of different Arctic Snowplows simply by changing controllers. (note (\*) Vehicles and plows must be MPX system compatible). Required for most newer vehicles.

### ARCTIC HD-P SPECIFICATIONS

Plow Name	HD90-P	HD96-P
Length	90"	96"
Moldboard Height	29"	29"
Material	3/8" Poly	3/8" Poly
Plowing Width (Full Angle)	78"	83"
Complete Weight	*674 lbs	*691 lbs
Mounting Type	Detachable	Detachable
Removable Lights and Power Unit	Yes	Yes

\* Weight does not include frame mounting kit

### OPTIONAL ACCESSORIES

SINGLE HALOGEN BULB (H9003)

DUAL HALOGEN BULB (H7, H1)

CURB GUARD

EXTEND. BL. GUIDES

LICENSE PLATE BRACKET

POLY CUTTING EDGE

SHOCK ABSORBER

PROWLING EXTENSIONS
