## Big-Drill Performer

Providing big-drill performance in a smaller machine, the Great Plains 1300 End Wheel Drill is clearly the best built end wheel drill on the market. Heavy-duty openers feature hydraulically adjusted down pressure for consistent seed placement along the full width of the unit.

Our rugged construction, combined with a superior opener system, make the unit ideal for minimum-till conditions. Plus, the weatherproof seed box features a 3.2 bushel-per-foot capacity – one of the largest in the industry – minimizing the number of refills required to finish the job. The openers are in line with the end wheels, reducing sideloading on curves or terraces.

**SEED BOX CONFIGURATIONS** - The large 3.2 bushel-per-foot seed box can be split for seed and fertilizer application. In addition, an optional small seeds box that mounts directly to the back of the main seed box is available.

00 Series Opener

## Features & Benefits

**4-SPEED SPROCKETBOX** - Provides excellent metering of a large variety of seed shapes and sizes.

**LOCK-OUT HUBS** - Quickly disengage all chains and sprockets for reduced wear during transport.

**FLUTED FEED CUP** - Provides gentle and even delivery of a wide variety of seed sizes and shapes.

**SMALL SEEDS BOX** - Smaller version of the fluted feed cup precisely meters small seeds.

**DOWN-PRESSURE ADJUSTMENT** - By locating the pin in one of five locations, you can adjust the down-pressure applied on all openers.
