

Features & Benefits

FERTILIZER ATTACHMENT - Easy cleanout and 6-point meter wheels accurately meter fertilizer.

SMALL SEEDS BOX - Smaller version of the fluted feed cup precisely meters small seeds.

FLUTED FEED CUP - Provides gentle and even delivery of a wide variety of seed sizes and shapes.

Native Grass

NATIVE GRASS - Great Plains has designed two models of 3-point drills specifically for the seeding of native grasses. The 3PNG12 and 3PNG15 combine the 00 Series Opener with our proven native grass attachment. They come standard with a 2 bushel-per-foot fluted seed box and a 1 cu. ft. per foot native grass box. Add a center pivot hitch or precision fertilizer hitch to enhance its no-till seeding capabilities.

3-Point Specialists

As seeding specialists, we recognize the need for different openers to match specific farming practices. Great Plains offers three openers in its 12', 15', and 20' 3-Point Drills to assure accurate seed placement in widely varying field conditions.

Choose between the 00 Series Straight-Arm Opener that comes standard, or the 10 Series Parallel Linkage Opener that features more travel and precise control of the contact

angle. Or choose the 20 Series Parallel Linkage Opener with its 2" x 13" side depth wheels to provide excellent depth control in min-till and conventional conditions. These side depth wheels also help prevent trench blowout in heavy gumbo-type soils.

Combine our opener options with superior construction and innovative engineering, and you'll quickly realize the advantages of owning a Great Plains 3-Point Drill.
