

# Features & Benefits

48" SWEEPS - Narrower-than-standard V-Blades provide more consistent depth in rolling conditions.

21" TREADER WHEEL - 7" spacing is ideal for breaking clods, uprooting weeds, and preparing a seedbed. Hard faced for long life.

HEAVY-DUTY ROLLING COULTER - Features a full 20" blade with a yoke-mounted, 4-bolt hub assembly.

Time is short. Moisture is limited. You need a tillage system that enables you to cover hundreds of acres while carefully managing residue conditions. Our 3-, 5-, and 7-section Plains Plows are engineered to withstand the punishment of demanding field conditions while effectively managing surface residue. In addition, the Plains Plow

takes field efficiency to the next level when you select our optional hard pan Ripper Shanks. These optional shanks enable you to perform multiple field operations in a single pass...truly taking your productivity and fuel savings to the next level. Models 9533PP and 9540PP are available with optional 250# wing weights.

## Sweep Selection

4-1/2" SHALLOW PITCH BLADES - The standard shallow pitch 4-1/2" blades allow shallow tillage and finishing with minimum ridging and lower horsepower requirements. This blade is recommended if higher tillage speeds and shallower tillage depths are desired.

6-1/2" HIGH PITCH BLADES - The optional 6-1/2" blade offers additional lifting of the soil for greater weed kill along with more wearing surface to increase the life of the blade.

MODELS 9322PP, 9326PP, 9533PP, 9540PP, 9744PP, 9748PP, 9752PP, 9756PP

# Undercutting at its BEST!
