

BrillionTM
Farm Equipment

A LANDOLL PRODUCT

TILL 'N SEED[®]

- 72" Seeding Width
- Rugged Structural Steel Frame
- Ground Driven Micro-Meter Seed Boxes
- Floating Cast Iron Firming Roller
- Floating Self-Cleaning Tillage Rotor
- Adjustable Tillage Rotor Down Pressure
- Great for:
 - Renovating Pastures
 - Restoring Athletic Fields & Lawns
 - De-thatching Lawns
 - Planting and Shredding Food Plots

BrillionTM
Farm Equipment

www.brillionfarmeq.com

A convenient hex interface is provided for simple seed calibration. Simply remove the klik pins and change out the sprockets for different seeding ranges as shown in the seed rate chart.

The seed box drive klik pin disconnects the seed drive for seed rate calibration and prevents wear and tear on the seed box drive when in tillage-only mode.

The wind deflector doubles as a trough for catching the seed during the calibration process.

The parking pin arm design allows the unit to maintain the correct orientation when unhitched from the tractor.

80 drive chain provides 2:1 drive ratio on the tillage rotor.

Designed and built from input received from customers and producers that desired a simple, reliable, and efficient machine, the Brillion Till 'N Seed® can operate under a wide variety of conditions with a multitude of seed varieties and seed mixtures.

Accurate metering of the seeds and placement at the correct depth into existing turf and growth was also a requirement built into the design. The Till 'N Seed utilizes ground driven tillage and seed placement rotors that are self-cleaning to allow operation in high residue conditions. The three-range seed meter drive system is coupled to the ground driven rotor for unequaled accuracy at nearly any operating speed. These unique features make the Till 'N Seed the ideal tool for seeding into existing turf, renovating pastures, restoring athletic fields and planting food plots.

The floating cast iron firming roller provides the final touch for an ideal seed bed.

A hand rail and simple flip down step allow the operator safe access to the seed boxes. A convenient walkboard provides a slip-free platform for the operator to safely fill the seed boxes. The walkboard is also hinged for easy access to the rotors below. A rubber guard prevents any debris or residue from being projected from the tillage rotors. Convenient brackets for lifting the machine on and off trailers and securing the unit while transporting are also standard equipment.

Easy to read seed rate scale.

Micro-metered rear seed box for small granular seeds such as alfalfas, clovers, etc.

Micro-metered front seed box for precision planting of fluffy and/or larger seed varieties.

Model BPSB-6 Shown With Standard Equipment

Standard meter box adjustment wrenches are conveniently stored on frame of machine.

Adjustable gauge wheels control the depth of the tillage rotor.

Heavy-duty 1 1/2" greaseable bearings are found on all rotor shafts.

The air shock maintains the tillage rotor's contact with the soil. The operator can add significant down pressure if desired by simply adding air pressure.

Operator's Manual Storage Canister

The three-point hitch is Cat. I, II, Quick-Attach and iMatch™ compatible. The hitch can be moved off-center for use on wider tractors.

The drive and tillage rotors are made of abrasion resistant steel for long life. The tillage rotor runs nearly 2 1/2 times faster than the drive rotor and is free to follow the ground's contour. Both rotors mesh together providing a unique self-cleaning design. The seed is dropped in front of the rotors allowing the tillage action to mix the seed with the soil. The seeder also has the unique ability to till more aggressively in ground with minimal vegetation.

Integral Parking Stand

SEED RATE CHART FOR REAR SEED BOX (Micro-Meter): Standard on BPSB-6

Brillion assumes no liability pertaining to seeding rates achieved with this seeder. Rates listed are general in nature and should be used as starting points only. Seed varieties and blends listed represent those calibrated through in-house test meters. Variations in actual rates may be realized due to differences in seed lots. For accurate rates with seeds being used, follow the calibration instructions listed on the seed chart inside the box cover or refer to the Operator's Manual.

SPECIFICATIONS

BPSB-6

Weight (Empty)	2,120 lbs. (962 kg)
Three-Point Hitch Type	Cat. I, II, Quick-Attach, iMatch™ Compatible
Tractor Horsepower Range	35 to 60 HP (26 to 45 kW)
Tractor Lift Capacity Requirement	2,150 lbs. (977 kg) 24 in. (610 mm) Behind Lift Arms
Overall Width	90 in. (2.29 m)
Working Width	72 in. (1.83 m)
Base Unit Length	46 in. (1.17 m)
Unit Height	50 in. (1.27 m)
Recommended Speed	4 to 8 MPH (6.4 to 12.9 km/h) (Dependent on Conditions)
Acres/Hour	2.9 @ 4 MPH, 5.8 @ 8 MPH
Rotor Axles	1.75 in. (44.45 mm) Square Shaft
Rotor & Roller Bearings	1.5 in. (38.1 mm) Greaseable Bearings
Drive Rotor (Front)	414 lbs. (193 kg)
Number of Blades	31
Blade Material	Abrasion Resistant Steel
Blade Spacing	2.25 in. (57.15 mm)
Blade Thickness	0.313 in. (7.95 mm)
Blade Diameter	13 in. (330.2 mm) OD
Drive Type	Ground
Tillage Rotor (Middle)	351 lbs. (166 kg)
Number of Blades	32
Blade Material	Abrasion Resistant Steel
Blade Spacing	2.25 in. (57.15 mm)
Blade Thickness	0.188 in. (4.78 mm)
Blade Diameter	13 in. (330.2 mm) OD
Drive Ratio	2:1
Rotor Speed	197 RPM @ 4 MPH, 394 RPM @ 8 MPH
Independent Floatation	Standard
Down Force Adjustability	Standard
Drive Type	# 80 Roller Chain
Firming Roller (Rear)	231 lbs. (105 kg)
Number of Cast Wheels	37
Independent Floatation	Standard
Air Shock	Standard
Air Pressure Range	20 to 120 psi (138 to 827 kPa)
Frame Construction	All Welded Structural Steel
Seed Box	Standard - Front & Rear
Seed Box Capacity	4.5 Bushels (158.5 l) + 1.4 Bushels (49.3 l)
Seed Metering	High Capacity Micro-Meter/Standard Micro-Meter
Seed Metering Drive	Positive Ground Driven
Drive Type	Roller Chain
Electronic Acre Meter	Optional
Powder Coat Paint, Red	Standard
