

Automatic

ATG10000

Features

- Sequential electric start up/shut down
- Electric hopper grates
- Rolls: 14" hardened to 56 Rockwell C
- Quick adjust rolls
- Magnetic grates
- Designed for quick and easy serviceability
- Each basic controlled by an individual motor
- Torsion axle suspension

Specifications

- 10,000 bu/hr capacity
- 350 bushel hopper
- 24" discharge conveyor
- 2-100 HP motors

Roy Ritter, RKR Feedlot West Point, Nebraska

Our Automatic 10K Electric mill is an outstanding machine. We use two one-thousand bushel dump pits.

On our biggest day, we process 145,000 bushels through the mill at about 9000 bushels per hour with 25 to 28% moisture.

I no longer dread high-moisture corn season.
