# WALCO TOOL ARM BRAS OUTIL WALCO

- ◆ Pendular mounting enables the cutter to follow the contour of the ground when control cylinder is in the float position.
- ◆ *Système d'attache permettant à la débroussailleuse d'être en position flottante afin de suivre le contour des fossés.*
- ◆ Mow ditches with down angle to 55°.
- ◆ *Fauche les fossés jusqu'à 55° d'angle.*
- ◆ Transport arm collapses to reduce stress to the arm, and also to stabilise the weight.
- ◆ *La débroussailleuse se replie sur le bras outil pour une plus grande stabilité lors du transport.*
- ◆ Main lift cylinder is equipped with a pilot to operated check valve to prevent the arm from drifting in the working position, and also to retain arm safety in the transport position.
