High performance tooth system

High performances in a compact size

The new FAE SCM/EX/VT stump cutter is designed to meet the needs of professionals to quickly and easily remove stumps in nearly any situation.

Equipped with exclusive features, this machine ensures the best results in a compact unit.

The FAE SCM/EX/VT is supplied with a flow control system that allows it to fit different power excavators.

The front hood with hydraulic adjustment and the special front thumb guarantees very high performance and maximum safety.

Thanks to the tough, reliable and easy to use special wheel, the stumps are simply swept away.

The hydraulic adjustment of the front hood provides safer working conditions.

The base plate ensures maximum safety while stationary.

The front fixed thumb is designed to move the cut material.

The easy setting of the „flow control system“ makes the SCM/EX/VT suitable for a wide power range of excavators.
