

BOOMER™ 3000 SERIES COMPACT TRACTORS WITH SUPERSUITE™ CAB

BOOMER 3040 | BOOMER 3045 | BOOMER 3050

YOU'VE BEEN UPGRADED TO THE SUITE – NEW HOLLAND BOOMER SUPERSUITE™ CAB

You'll work with greater comfort and control than ever before in New Holland 40- to 50-horsepower Boomer™ compact tractors equipped with the factory-installed SuperSuite™ cab and EasyDrive™ Series II continuously variable transmission (CVT).

THE UTMOST IN COMFORT, STYLE AND CONVENIENCE

For the most comfortable environment available in a compact tractor, look no further than to the SuperSuite™ cab, available on the Boomer 3040, 3045 and 3050. Because of standard heat and air conditioning, you can work in all-day comfort, protected from weather, insects, dust, and noise. For easy storage, the cab clears a standard 8-foot garage opening.

SPACIOUSNESS COMES STANDARD

The SuperSuite cab is the biggest cab in its class. You'll find the hip room, legroom, and headroom to be generous, to say the least, with 60 cubic feet of interior space surrounding you. Two large doors with grab rails open on gas struts to wide 16.5-inch entry thresholds for easy entrance and exit on either side.

VISIBILITY COMES FIRST

You will instantly see the difference 46.9 square feet of glass makes. It adds up to 360° visibility that cannot be matched in any other compact tractor cab. The sloped hood gives you excellent forward visibility from the tractor seat. That's because the muffler is under the hood and not in your line of sight like competitive tractors. Add the sloped-arm New Holland 250TL loader and you get a clear line of sight to the bucket edges. A standard high-visibility roof panel allows you to see the loader through its full range of operation for safe, efficient and fatigue-free operation.

BEHOLD THE ACCOMMODATOR™ SEAT

To maximize your comfort and visibility, this premium seat glides on an inclined track to place you at the right spot. It also features three inches of vertical suspension and swivels 20 degrees to the right, making it easy to view your work or the implement behind you.

THE MOST STANDARD FEATURES

Convenience and comfort are part of the design of Boomer 3000 Series tractors. You get a long list of deluxe features – and all are standard equipment, including tilting/telescoping steering wheel, exterior and interior mirrors, a deluxe three-point hitch and much more. Check the full listing on the back page.

EASYDRIVE™ SERIES II CONTINUOUSLY VARIABLE TRANSMISSION (CVT)

The EasyDrive™ Series II CVT is designed to provide smooth, seamless speed changes through varying conditions. EasyDrive controls are unique, featuring a single pedal to control both travel speed and engine speed. Just press the single pedal and go – the transmission automatically adjusts to deliver the desired speed and match load conditions. Change directions using a convenient shuttle like those found on larger tractors. The lever is mounted on the left side under the steering wheel for easy operation.

ADDITIONAL EASYDRIVE™ ADVANTAGES

What's more, the EasyDrive CVT gets the job done efficiently, so whatever you're doing feels less like work and more like fun. This innovative transmission offers an automotive-style cruise control, allowing you to hold, fine-tune, or resume working speeds. A reactivity setting allows operators to adjust the acceleration and deceleration characteristics of the tractor to suit their driving style or application. In slippery conditions, just engage four-wheel drive electronically with the flip of a switch. With a speed range up to 18.6 mph, you are sure to get all the chores done fast.

MAINTENANCE MEETS CONVENIENCE

Maintaining a Boomer compact tractor is easy because all routine maintenance points are located on the right side of the engine. In addition, you can easily check engine oil level without raising the hood and without removing the loader.

ACCESS DOESN'T GET ANY EASIER

For easy access to the engine, radiator, air cleaner, power steering reservoir, and battery, simply open the hood. It raises and pivots forward, allowing for access even when a loader or front blade is attached.

FILL UP LESS OFTEN

You can operate for longer periods in between fill-ups thanks to some of the industry's largest-capacity fuel tanks. Tanks are located at the rear of the tractor, and also have wide fill necks for easy refueling.

ADDITIONAL STANDARD EQUIPMENT – CAB

- 2 wide-opening doors with grab rails and gas strut assist
- Deluxe cloth-covered seat with weight adjustable suspension and swivel
- Tilt and telescopic steering column
- Interior rearview mirror
- Suspended brake pedals
- 12V power outlet and accessory power socket
- Adjustable sun visor
- Single cab air filter
- Left and right side steps
- Removable plug in rear of cab to route harness
- Cup holder
- Toolbox
- Dashboard instrumentation includes fuel gauge, temperature gauge, tachometer, PTO speed indicator, hour meter, cold starting aid indicator and warning lights for engine oil pressure and battery charge

- Safety start system includes an operator presence switch
- Cell phone clip
- Flexible link-ends
- Telescoping stabilizers
- High-visibility roof panel
- Heat and air conditioning
- Radio-ready with antenna and speakers
- Dual external mirrors
- Front and rear cab-mounted work lights
- Front windshield washer/wiper
- Rear window wiper and washer kit (optional)
- High-visibility panel guard for cab roof (optional)

Enjoy the very highest level of comfort and control – choose a New Holland Boomer compact cab tractor.

WARRANTY

Full coverage: 24 months or 2000 hours Powertrain: 36 months or 2000 hours

* Extended warranty available
