Left or Right Discharge “Rock not Roll” Bale Processor Built to Handle Canadian Winters

Ensure palatable feed and even bedding while reducing feed and bedding costs with the one-of-a-kind Jiffy Bale Processor. Unlike systems that must unroll the bale for shredding, our unique hydraulic cradle rocks bales of any size or shape over the hammers, so the entire cross-section of the bale can be shredded at once. The result is higher feed utilization and a more consistent bedding pack. The Jiffy Bale Processor's cradle system constantly and evenly feeds the hammers. Jiffy Bale Processors are available in left or right discharge models so you can choose the correct model to suit your operation. Roll in the toughest of conditions – heavy duty hammers process the toughest of bales regardless of shape, size or moisture content.

Unique “Rock not Roll” processor

- Patented rocking cradle.
- Aggressive Tread Floatation Tires standard on all models.
- Simple hydraulic valving activates cradle rock and speed.
- Effective cradle travel adjustment.
- Cradle system constantly and evenly feeds hammers.
- Cradle speed sets length of cut.
- Cradle feeds hammers until the bale is gone.
- No belts, no chains.
- There is no wrong way to load bales.
- Exclusive rocking cradle design handles all types and shapes of bales.
- Outer and inner hay is shredded together delivering even quality.
- No issue processing older, out of round and broken bales.
- Round bales are never unrolled.
- Process high moisture silage and hay bales.

Round or square bale loading systems

- Load up to 20 small square bales (927 & 928).
- Full adjustable loading forks.
- Handle all sizes of bales.
- Hydraulic Bale Clamp Arms (978).

Designed and built for harsh winter conditions

- Left or Right discharge (927 & 928).
- Built in PTO shaft & hydraulic hose storage bracket.
- Unibody frame construction.
- Deflector allows you to windrow product or feed directly into bunks.
- Easy access to shear pin.
- Remove twine through access door opposite of discharge.
- Fully adjustable clevis hitch.
- Optional Hydraulic Deflector Lift available.

Models 927, 928 features

- 136" wide by 193" long
- 32 hammers
- 83" rotor length
- Right or Left Discharge Models
- 12.5 x 15 Floatation Tires
- Optional 44 bu. Grain Tank with Discharge Auger

Model 978 features

- 139" wide by 248" long
- 48 hammers
- 130" rotor length
- Right Hand Discharge
- Loads large square or rounds – no machine adjustment required
- Hydraulic Clamping Forks – specially designed for large square bales
- 16.5L – 16.1SL Floatation Tires
- Engineered bale slide for precision bale placement in cradle
- Exceptional straw throw distance and spread
- Superior clean out with no straw left in chamber
- Spring assisted gas shocks reduce bale impact when loading

Features Common to All Models

- PTO 1 3/8 in., 21 spline 1000 RPM CV
- 25 in. Rotor Swing Diameter
- 1/2" x 2" x 5-3/4" Hammer Size
- Optional Hydraulic Deflector Lift
- 96 in. Wheel Track
- Heavy Duty Hitch Jack with Lock Arm
- Adjustable Hitch with Heavy Duty Clevis and Safety Chain

RENN is the manufacturer, distributor, and parts & service provider for Jiffy Products.

RENN... Listening, Learning, and Leading

For decades RENN has been a global leader in the design and manufacturing of grain bag storage systems and feed processing equipment. From its modern manufacturing plant in Central Alberta, RENN connects directly with farmers – listening and learning from their on-farm experience to continuously improve its products.

RENN's close client relationships and commitment to the integrity of its products have won over customers throughout Western Canada and around the world. Clients know that every RENN product delivers proven performance, dependability, and serviceability.
