

RGB 1016T Bagger

- On-board, telescopic swing auger
- Compact folded-auger design for easy transport
- Go from transport to working mode in seconds
- Flexibility of truck and/or hopper unloading
- Convenient hand-held remote control
- Wide tire placement prevents ruts under bags

RGB 1016T

The RGB 1016T adds a convenient on-board telescopic swing auger to the proven RENN grain bagging system in a compact, easy to transport machine. A hydraulic folding in-feed auger transforms the RGB 1016T from transport mode to operating mode in seconds. The unique rack and pinion system quickly extends or retracts the telescoping auger placing it under the truck or trailer. The hydraulic ground drive moves the auger horizontally under the trailer to reach different dump hoppers, minimizing truck movement. The telescopic swing auger, hydraulic ground drive, and bag crane are all conveniently operated from a single remote control. The RGB 1016T fills 10' bags at up to 18,000 bushels per hour and requires a tractor with just 80 horsepower and 20 gallons-per-minute hydraulic capacity. Once the grain bags have been filled the innovative folding design makes the RGB 1016T easy to maneuver on roads, around bags, and in farm yards or storage sheds.

RENN Grain Bagger Specifications

RENN Bagger Model	Tunnel width (ft.)	Auger diameter (in.)	Surge Hopper	Weight (lb.)	Max. rated load capacity*		Operating width (in.)	Min. HP	Min. Hyd. Flow (gpm)	Infeed auger capacity
					bu/hr.	t/hr.				
RGB 1016T	10	16	8'x8'	6575	18,000	480	162	80	20	9000 bu/hr 240 t/hr

* Based on Surge Hopper loading

RENN... Listening, Learning, and Leading

For decades RENN has been a global leader in the design and manufacturing of grain bag storage systems and feed processing equipment. From its modern manufacturing plant in Central Alberta, RENN connects directly with farmers – listening and learning from their on-farm experience to continuously improve its products.

RENN's close client relationships and commitment to the integrity of its products have won over customers throughout Western Canada and around the world. Clients know that every RENN product delivers proven performance, dependability, and serviceability.
