2345 T - 9660 T

TELE WHEEL LOADER

Expertise for the construction industry

**ONLY WHEN PERFORMANCE
MEETS PERFECT QUALITY,
can driving pleasure become standard equipment.**

SCHÄFFER

From 15 kW (20 HP) to 115 kW (157 HP). For over 60 years, we have been developing loaders to meet individual requirements. Customer satisfaction has made us what we are today: One of the most capable and successful suppliers of farm loaders, wheel loaders and tele wheel loaders ever. Every day our employees create new, customised solutions.

Every Schäffer loader is the result of years of experience and innovative thinking. Our products set standards in terms of the highest possible reliability and durability. With lower costs throughout the whole operating life. With even more performance, safety and driving comfort for many years to come.

SCHÄFFER TELE WHEEL LOADERS – AN INDISPENSABLE AID ON THE BUILDING SITE

Schäffer tele wheel loaders combine the manoeuvrability and clear visibility of an articulated wheel loader with high lift height and range of a conventional telescopic loader. More and more customers are opting for one of the nine models with an operating weight between 2.9 and 13 t.

Due to their articulated steering, Schäffer tele wheel loaders are extraordinarily dynamic in use. The rear end of the vehicle always follows in the tracks of the front end. Manoeuvring is very simple and mobility is great thanks to the high steering angle. The large, centrally-positioned cab gives the driver perfect all-round visibility. Not least also due to the low front end, whose height has been reduced in comparison with the previous models.

This means that the vehicle operator always has a perfect view of the attachments and can work more productively and safely.

Depending on the model, the maximum lifting height is between 3.75 m and 6.10 m. The Ferro-Form sliding members of the telescopic arm are indestructible. The tool cylinder is located within the telescoping arm and thus protected from damage. The machines achieve very good break-out forces through the integrated Z-kinematics, and are therefore the ideal workhorse on the building site.

But even in the communal and industrial applications, more and more customers are choosing Schäffer.

SCHÄFFER 3550T

POWER DELIVERY IN PERFECT SHAPE

Compact: tele wheel loaders are universally operable machines for any business. The 3500 series loaders with their 3.7 t operating weight deliver the perfect combination of strength, lifting height, range and manoeuvrability.

The lifting height and range, which are far greater than that of a normal compact wheel loader, open up entirely new application options. The loader's lifting height is 3.85 m, meaning that the vast majority of trucks can be loaded with ease. No compromises were made in terms of lifting capacity. The tipping load is substantial at up to 1.7 t, thus enabling powerful loading cycles. Thanks to their articulated steering, the loaders are extremely manoeuvrable. Manual labour can be mechanised wherever larger conventional telescopic loaders or large wheel loaders are simply too big, and too inflexible.

The 3550 T is also extremely easy to use off road.

[SCHAEFFER-LADER.COM/3550T](https://schaeffer-lader.com/3550t)

**OPERATING EFFICIENCY
WITHOUT COMPROMISES**

SCHÄFFER TELE WHEEL LOADERS: THE FLEXIBLE ALL-ROUNDERS

Schäffer tele wheel loaders offer a perfect combination of performance, comfort and reliability, and are suitable for operations of all kinds. The hydrostatic traction drive delivers high thrust forces coupled with very low fuel consumption.

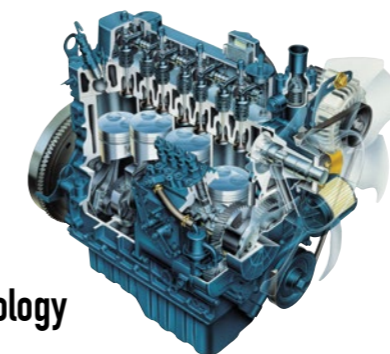

The machine is very simple and intuitive. The view of the attachments is excellent. The comfortable seating position guarantees relaxed and productive work at all times for the driver.

Schäffer loaders not only increase productivity, but are also genuinely fun to drive. The mode of operation and handling are very similar to that of a conventional wheel loader. And it is correspondingly easy for a driver to adjust to a Schäffer tele wheel loader. After just a short learning curve, the driver will really appreciate the additional lifting height and reach.

Schäffer also offers a very wide range of work tools. Whether you need a pallet fork, a soil or light bulk materials bucket, a sweeper or snow plow for professional use – the tool quality standard is just as high as for the loaders themselves. From the 6680 T model, if desired, the machines can be equipped with a work cage for road-legal use.

Especially with the larger machines from the 8610 T up, it makes sense to look more closely at the different versions of the working hydraulics. The simplest variant is a gear pump whose power is already sufficient to meet many requirements. There are also heavy-duty gear pumps or flow-sharing hydraulics to choose from.

Another option is load-sensing work hydraulics with high performance and excellent efficiency.

Engine technology by Kubota

Schäffer has relied on Kubota for over 25 years. The leading manufacturer of compact diesel engines has earned an excellent reputation in the face of demanding tasks on construction sites all over the world. Even at Arctic temperatures these engines start up easily. The engine sound conveys safety and strength. And the excellent torque band guarantees this. Just as important: Maintenance is easy to carry out. Service lives of 10,000 hours and longer are no exception.

Kubota engines are very economical and really utilise fuel to the max.

Original Schäffer axles – thrust without end

Original Schäffer axles are 100% tuned for each model. And that's the secret behind the superior thrust of all Schäffer loaders. Independent tests confirm this time and time again. Talking of safety: From the 3550 T model upward, the permissible load-carrying capacity is a massive 7 t per axle.

All tele wheel loaders are equipped with enclosed, multi-disc brakes that run in an oil bath. You can always rely on these brakes. They not only offer the best possible deceleration values, but are also completely maintenance-free. Dirt, dust or wear don't stand a chance.

SCHÄFFER 5680 T

ADDED VALUE AS A FACTORY STANDARD

Here are just six reasons that make these loaders value added machines:

1. The lifting height of up to 4.70 m in the 4 t class is simply exceptional.
2. The optimised Z-kinematics and the strong tool cylinder in the lifting arm ensure a high level of break-out force.
3. The sliders in the telescopic arm are made of a special Ferro-Form composite. A long service life is guaranteed, as the material is practically wear-free.
4. Thanks to a low boom attachment point the driver enjoys excellent all-round visibility. The driver always has a perfect overview, and can thus work quickly and safely.
5. The rear axle is freely suspended and contributes to the excellent stability of the loader. Good for your safety, and for off-road use.
6. Deutz engine technology: Indestructible, economical, quiet and strong. An oxidising catalytic converter is used in the exhaust emission control system.

SCHÄFFER 9640 T

9640 T: LATEST GENERATION TELESCOPIC WHEEL LOADER

The 9640 T represents a new machine generation from Schäffer. The machine design has been reworked and is now significantly more dynamic. In this way, from the outside the telescopic wheel loader already gives the impression of force and agility, provided by the powerful 100 kW Deutz motor. Compliance with exhaust gas level Tier IV final is achieved without a diesel particle filter which requires a lot of maintenance – and this together with the maintenance-free articulated joint gives an additional benefit in terms of operating costs.

Another highlight of this machine is the new SCV-Plus cabin. It sets new standards in terms of comfort, all-round visibility and ergonomics and is one of the best cabins in this machine class.

SDCT autodrive with ECO Mode and 40 km/h

As an option the 9640 T is available with the SDCT autodrive. SDCT stands for „Schäffer Dual Clutch Transmission“. This

is a dual-clutch gearbox, which combines the benefits of powershift transmission with a purely hydrostatic autodrive. The drive is controlled electronically and enables a speed of 40 km/h.

The 9640 T is particularly efficient in ECO Mode, this is also part of the SDCT drive. If conditions permit, the motor speed will reduce automatically from 2,300 revs to 1,800 revs – all while maintaining the same speed. This allows a fuel saving of up to 10 %. As well as a further reduction in operating costs, lower noise level and more environmentally-friendly operation are further benefits of ECO Mode. In the case of increased performance requirement, the electronics automatically switch to the full rotational speed – it could hardly be more efficient and comfortable.

THE NEW SCV-PLUS CABIN

ERGONOMICS AND COMFORT AT THE HIGHEST LEVEL

The new SCV-Plus cabin is used on the telescopic wheel loader in the 8600 and 9600 range. Even at first glance, a tidy dashboard, ergonomic operating elements and the new colour co-ordinated range of switches give an overall impression of top quality.

SCV stands for „Silence, Comfort, View“. In the development of the SCV-Plus cabin, these ideas have been taken one step further. The operating elements are arranged in a more ergonomic way. The joystick is more comfortable to hold, additional functions speed up how you work. The extensive glass area offers the very best all-round visibility.

The ignition switch, along with the controls system for the air-conditioning and heating systems is housed in a new console right next to the joystick. Additional, larger air outlets and removable side panels ensure the perfect supply of fresh air. With the new SCV-Plus cabin the driver has a completely new feeling of ergonomics and comfort – nothing to stand in the way of a long working day.

THE NEW SCV-PLUS CABIN IN DETAIL

New joystick with expanded functionality

New console: Ignition switch, controls for the heating and optional air-conditioning system are easy to reach

Additional, larger air outlets for perfect air circulation/ optimised range of switches

12 Volt socket for charging mobile devices / 3-pin device socket

Side panels can be lifted out

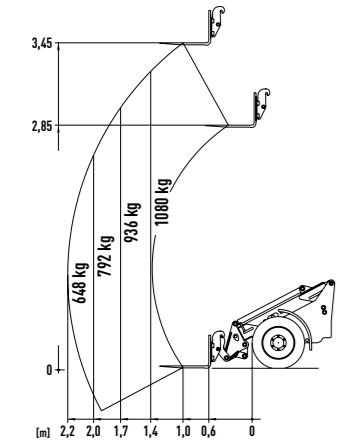

New information display in the B-column for the exhaust gas system

DIMENSIONS

All technical specifications in this brochure refer to serial models and describe their standard functions. The equipment components and their functions as well as the accessories depend on the individual model and the product options and also on the country and customer specific requirements. Images may contain products or equipment components which are not mentioned or cannot be obtained as a standard. The descriptions, measurements, images, weight specifications and technical data correspond to the state of the art at the time of printing and are non-binding. We reserve changes in the field of construction, equipment, optics and technology without prior notice, due to the continuous development of the products. In case of doubts concerning the performance or the mode of operation of our products due to special circumstances, we recommend the execution of work samples under controlled conditions. We cannot exclude deviations from images or measurements, calculation errors, printing errors or incompleteness in the prospectus despite all due care. We do therefore not accept any liability for the correctness and completeness of the specifications in this prospectus. We do guarantee the proper functioning of our products within the scope of our General Terms and Conditions. Any guarantees that go beyond these are on principle not provided. Any liability beyond the ones set out in our General Terms and Conditions is excluded.

made by SCHÄFFER

Schäffer offers a programme with 40 different models, each adapted to your needs. Our loaders' range of operations is versatile: whether in agriculture or construction, gardening and landscaping, industrial and commercial applications, in stabling or warehouse management – Schäffer is always your best choice.

The way Schäffer loaders are developed, produced and serviced is unique. The real difference is our experience of more than 60 years. We think of the end user first, because we seek to make your job safer, more comfortable and more profitable. Additionally, at our Erwitte location in Germany we rely on state-of-the-art development and production technologies. Ultimately, it is our employees who continuously develop new solutions, in close contact with the end user. Years of company service together with an enduring spirit form the basis for the special competence and for our global success.

The Schäffer name does not just mean unique product quality. It also stands for safety and optimal service that we guarantee both in Germany, Europe and around the globe.

Purchasing a Schäffer loader is the beginning of a long-term relationship. Your machine will only remain a 100% genuine Schäffer if you use original replacement parts. Only then will it guarantee the reliability you need, and have the right to expect. We offer you and our service partners a 24 hour delivery service – 7 days a week, 365 days a year.
