

2023

INTRODUCING

2023 PWC Trailers

Elite, LT, and Wave Series PWC trailers are even stronger and more adjustable with new features and designs that also improve material availability

/ Clean, modular designs

for Elite, LT, and Wave Series

/ Fully welded, all-aluminum

tube construction across all Triton PWC trailers

/ Elite Single Torsion PWC Trailer

for the growing demand for torsion axles

/ ISA Bunks and Bow Stops

provide the best PWC fitment and trailering experience

/ Standardized Components

make it easier to service and stock parts: Lights, fenders, tongue rests, keel guards, bunk assemblies

/ Tie Downs for LT and Wave Series

NEW Clean, Modular Designs

TRITON
TRAILERS

New Elite Series Single Trailer

New LT Series Double Trailer

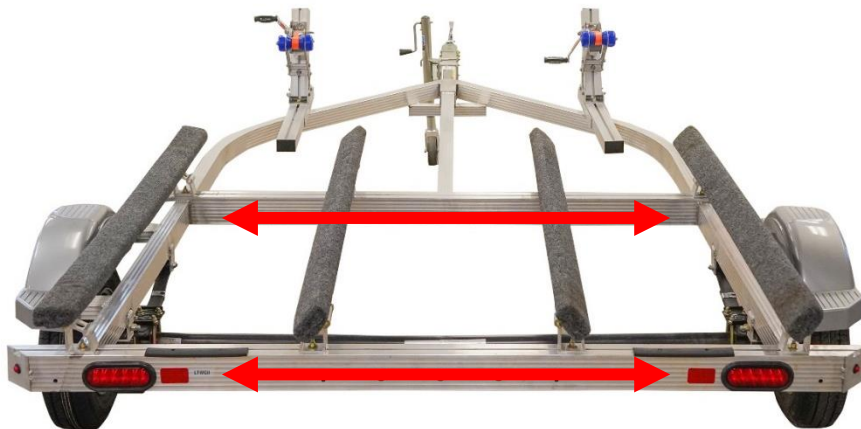

New Wave Series Single Trailer

NEW ISA Bunks and Bow Stops

Triton's exclusive Infinite Slide Adjustable (ISA) Bunks and Bow Stops precisely and securely fit the wide variety of PWC designs, providing the best fitment and trailering experience

ISA bunks easily slide and position on crossmembers with integrated carriage slots

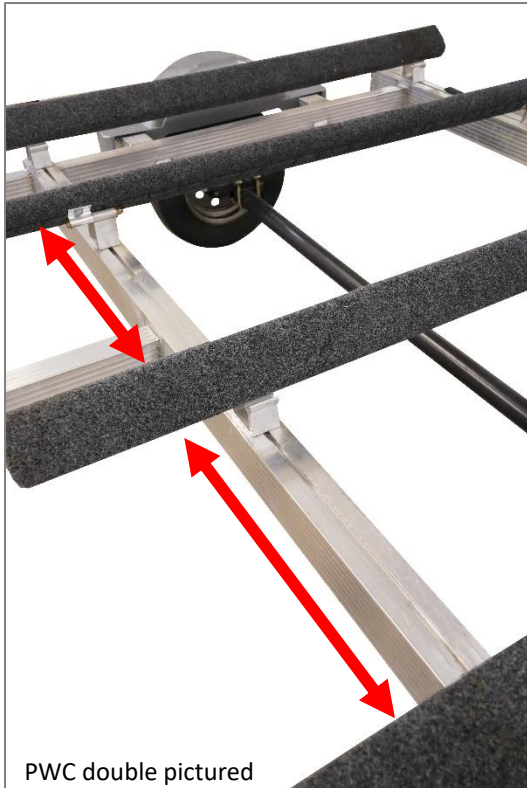

All ISA bow stops have three points of adjustability

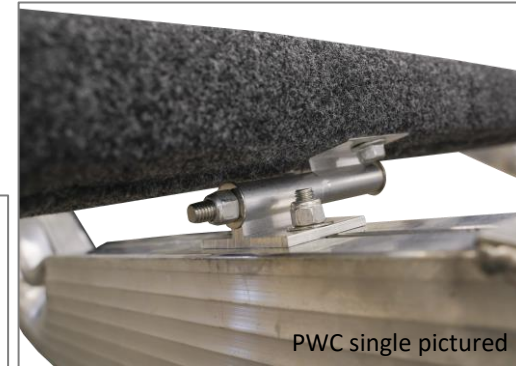

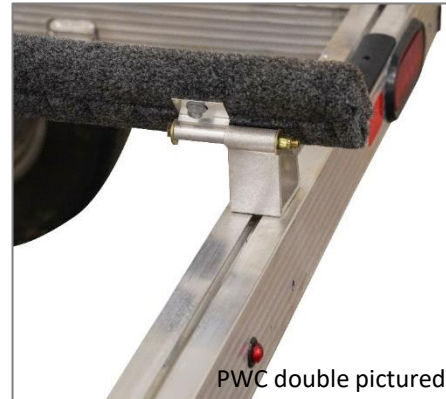

Patent Pending

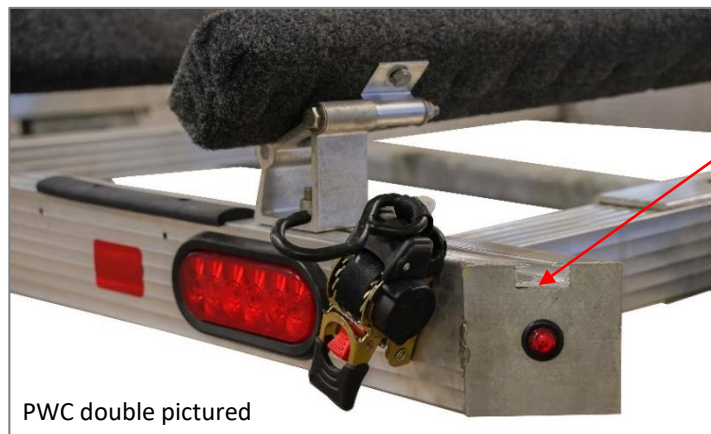

NEW ISA Bunks and Bow Stops

ISA bunks easily slide and position on crossmembers with integrated carriage slots

Bunk supports easily adjust by tightening or loosening the nut. Same process as today but with a wider range of adjustability.

All crossmembers provide full access to the carriage slot

NEW Elite Single PWC Trailer

TRITON
TRAILERS

Standard Features

Torsion axle

Stainless hardware

6' ISA bunks and ISA bow stop

(2) retractable ratchet straps

Tongue jack

LED lights

Fully welded, all-aluminum tube construction

Note: this trailer replaces the LTWCI-TX and LTWCI-TXS

NEW Tie Downs for LT and Wave

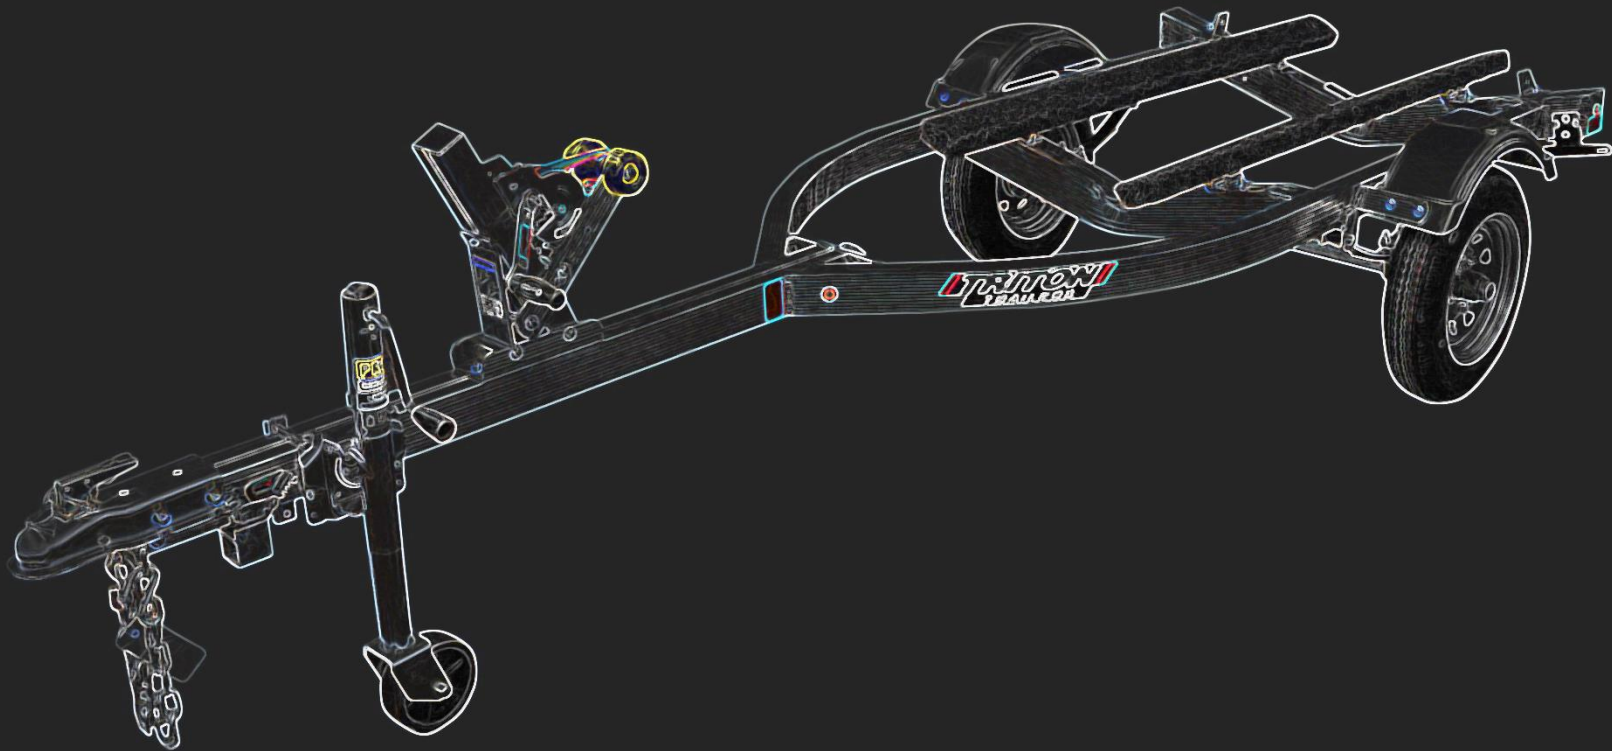

LT Series (non-X package) and Wave Series PWC trailers include 5/16" D-rings:

- Single PWC trailers: (2) D-rings assembled to rear crossmember
- Double PWC trailers: (3) D-rings assembled to rear crossmember

Elite Series and LT Series X package trailers include (2) ratchet straps per machine, same as today

All trailers have holes in the underside of the rear crossmember for backup tie down points, same as today
