

MANURE SPREADERS

Innovators in the Manufacture of Agricultural and Commercial Equipment

H&S HAS A MODEL TO FIT YOUR OPERATION

GROUND DR

STANDARD FEATURES ON ALL MODELS

Spreader box is constructed of corrosion resistant galvanized steel. All spreaders utilize a bonded poly floor to reduce main apron drag and power needed to move the load.

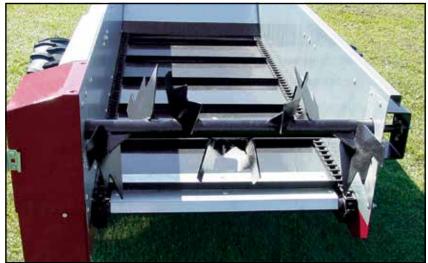

To engage the beater and main apron on **Models 1150** and **1180**, lower the control lever.

The beater on **Model 1125** is 20" in diameter and with 8 paddles provides an even spread of material. Shown with optional fine spread pan.

The Model 1150 uses a heavy duty 8 paddle beater assembly.

IVE MODELS

Apron Engage/ Disengage Lever Beater Engage/ Disengage Lever

Main **apron tightener bolts** are located outside on the lower right & left corners of the main frame for adjustment.

Shown with safety shields removed. The beater is chain driven. The main apron is driven by a simple adjustable ratchet drive mechanism.

P.T.O N

STANDARD FEATURES ON ALL MODELS

Spreader box is constructed of corrosion resistant galvanized steel. The heavy duty steel A-frame and hitch assembly is built to withstand the stress of heavy loads and rough roads.

The **Model 2117** uses an all welded heavy duty A-frame hitch assembly and full length unitized main frame.

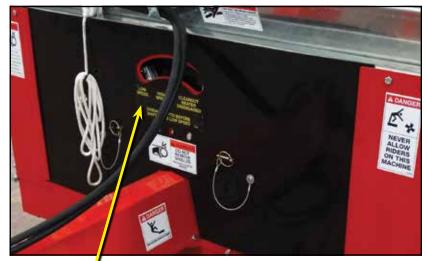

All spreaders utilize a bonded poly floor to reduce main apron drag and power needed to move the load.

Shifting on the PTO models is done in the H&S two spread gear box plus beater shutoff.

The large diameter beater on **Models 2112** and **2117** provides an even spread pattern.

A 2-speed apron drive system is standard equipment on the 2180, 2112, and 2117 models.

IODELS

On all models, the **main apron tightener bolts** are located outside on the lower right and left corners of the main frame for adjustment.

Shown with **optional** rear trip pan. The heavy duty 10 paddle beater assembly assures aggressive shredding action with even wide spread patterns.

H&S spreaders have a massive unitized welded frame.

• Strong rear main beater side panels are slanted for clearance and wider spread, and then welded to the strong 5" U channel side members. Compare with any on the market.

HEAVY DUTY MAN

• Greasable side shaft bearings on all models.

MODEL 3131 310 Bushel, Struck level 185 cu. ft.

HYDRAULIC END GATE FEATURES

3131 HIS MALLAT

る語

3131 H&S

必用

• A semi-liquid hydraulic end gate is standard equipment on all models. A second hydraulic endgate cylinder is standard on the 3137, 3143, W3143, 3156 and 3166.

• An optional second hydraulic end gate cylinder is available for the 3123, 3127 and 3131. The hydraulic lines are run through a 3x3 tube under the floor. The upright position of the hydraulic cylinder stroke allows the gate to lift with the least strain at pivot points.

S137 HES MARTIN

の日

• Sides, front panel and both sides of the rear hydraulic end gate on 3123-3143 use fiberglass reinforced plywood to provide for easy cleaning and minimal freeze up. The 3123 and 3127 models

feature a plastic coated plywood floor, while the H&S 3131, 3137 and 3143 models have a solid virgin grade poly floor. Considerably less torque is needed to move a heavy load with both styles of floors.

UNLOADING SPEED	3131-W3143		
(2 speed chain drive)	PTO SPEED		
HIGH SPEED	540 RPMS - 8' 8½" PER MINUTE		
LOW SPEED	540 RPMS - 4' 8½" PER MINUTE		

 Optional variable speed hydraulic drive available on 3131-3143W.

> MODEL 3137 370 Bushel, Struck level 235 cu. ft.

A 2-speed apron drive is standard equipment on all models.

1

3137 H&S

IURE SPREADERS

3143 115 1000

6 m

MODEL 3143 430 Bushel, Struck level 275 cu. ft.

4-A 6

• Gear box mechanisms and drive for the beater and apron of **Models 3131, 3137 and 3143** are Timken tapered roller bearing equipped. The beater drive gear box is $1-1\frac{1}{2}$ bevel gear oil bath equipped with a 4-jaw over running clutch for beater shut off. The **apron drive** is a 50:1 bronze worm gear with shear bolt protection.

- The strong **oil bath bevel gear box** that powers the beater is tapered Timken roller bearing equipped. The gear box utilizes a 4-jaw beater shut off clutch and tractor sized spline shaft.
- **Replaceable splined hub** that welds into the main beater tube.

H&S Rugged Dependability!

• The **rear pan** is optional on all models.

• The **W3143 (western)** has all the same features as the 3143 with additional features such as double main frame channels, additional floor supports, 1045 hardened drive shaft, #80 drive chain and a heavy duty main gear box.

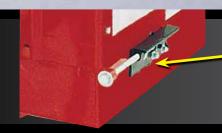

MODEL W3143 430 Bushel, Struck level 275 cu. ft.

HEAVY DUTY MAN

 The 3156 features 425x22.5 used truck tires as standard equipment. Optional tires include 19Lx16.1 or 600/50x22.5

The **3156** and **3166** manure spreaders feature a heavy duty 7" structural steel channel iron frame with a double channel iron pole for superior strength and comes standard with variable speed hydraulic drive and constant velocity PTO.

• The box of the 3156 and 3166 spreaders consist of **solid virgin grade poly floor**, T-Bar chain for a strong double main apron and plastic coated plywood sides, front, and endgate.

• A **rear side hinged door** on the beater drive allows easy access for servicing and adjustment of the spring loaded tighteners.

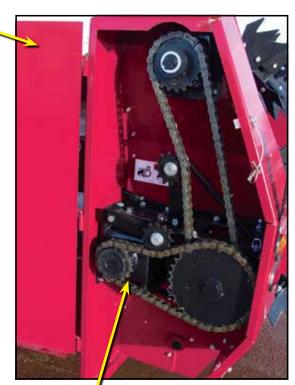

• The electric-over-hydraulic **variable speed apron drive** on both models features a heavy duty hydraulic motor with a heavy apron chain reduction gear box.

JURE SPREADERS

NODEL 3155 660 Bushal, Struck laval 479 cu. ft.

- The 3166 running gear consists of stress proof spindles with 12000# hubs and a 41/2" stress proof axle pivot.
- Adjustment for the main apron is easy, by simply loosening the two side bolts and drawing up the long bolt.

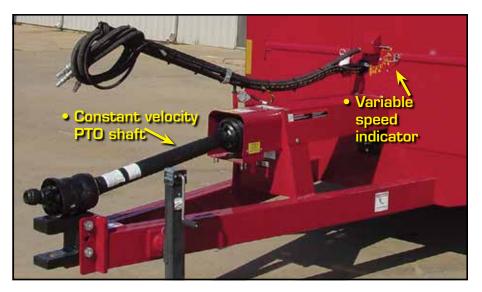

• The beater drive system features a heavy duty worm drive gear box, chain reduction, and a four jaw override beater clutch.

HISE

• The top beater is standard equipment and both beaters have 18 replaceable blades.

HYDRA-PUSH MAN

Vertical & Horizontal Beater assemblies are interchangable and removeable.

 Easy open shields makes lubing of bearings easy.

• The HSS Hydra-Push-Off System on all models feature two hydraulic cylinders that sequence to reduce push-off forces, and fast unloading of material.

×.

Center Drive System

- Heavy duty rectangular tubing is used for the pole to ensure strength and long life.
- Structural channel floor supports spaced 9½" apart are used for maximum floor support.

Beater blades are replaceable!

• Installation of either beater assembly is done by removing the mounting bolts and a drive chain, interchanging beaters, then reinstalling the mounting bolts and drive chain.

 A straight shaft off the PTO connects to an angle gearbox in the rear, and over to the beater drive sprocket.

NURE SPREADERS

- #80 chains are used for strength and long life.
- **Auto-oiler** for the vertical beater drive chains is standard equipment.
- **Beater gearboxes** are safely mounted on the top side of the vertical beaters rather than the bottom to avoid being destroyed by foreign objects.
- The **hydraulic endgate** has **2 cylinders** with 3/8" hose and pipe for faster operation in cold weather.
- **Quick release clean out pan** on the Vertical Beater, shown below in open position for clean out.

• All HP models use solid virgin grade poly with UV inhibitor, for the floor and sides allowing less friction.

TOP SHOT - SIDE DISCHAF

- The **manual adjust top expeller shield** sets the distance of the spread pattern, while the hydraulic door cylinder allows adjustment for rate of application.
- Reversible bolt-on square tooth paddles shred and rip material with a "Top Shot" action for an even spread pattern.

HEIGHT @ REAR SPLASH	101"		
HEIGHT @ FRONT SPLASH	101"		
OVERALL WIDTH	12'		

• The **5234 and 5242** drive system features a heavy duty gearbox reduction with an overrunning torque limiting clutch for protection and smooth power transfer.

5234 and 5242 Options

• The hydraulic lid can be installed to open and latch from either side. A 3rd tractor remote is required to operate the opening and closing of the lid. This remote is also used in conjunction with an electrical toggle switch to activate the switching of the hydraulic valve that operates the hydraulic cylinder to lock and unlock the lid.

STRONG HERITAGE STRONG PEOPLE

STRONGER FUTURE!

For over 50 years, H&S Manufacturing has made life better. Our team is committed to building long-lasting relationships and high performance machinery. As we continue to grow and move forward we want you to farm smarter with our most reliable and innovative farming equipment.

H&S is proud to be American Made!

Warranty: See operators manual for warranty details and limitations. HSS reserves the right to change its products or the description at any time without notice or obligation.
