Twenty years in the forestry winch business has given Harco a tremendous insight into the needs of customers in Eastern Canada and U.S.A. We have designed our Big Jim series winch with that in mind and came up with a winch that is stronger in several areas & is more ergonomically appealing to the customer. Our brochure lists many significant improvements in winch design and we are sure you will find much lower cost of service and repair as the Big Jim Winch uses North American bearings, drive chain & sprockets.

TOP SOIL SCREENER

### Advantages:

5 year's experience using competitor's models and our earlier prototypes (approximately 200 MT processed prior to arriving at our own design.)

Fast, convenient moving, insert loader bucket into twin forks on discharge side.

Also twin loops for chain lifting at approximate balance point.

Oli vibrator 110V standard, purchaser to complete electrical wiring for their requirements and local codes. Can be operated with 110 extension cord, generator or inverter.

Vibrator frame and tension springs mounted in rubber blocks.

Screen hinge pins mounted in rubber blocks (use of isolating rubber mounts reduces vibration loss through main frame keeping as much vibration on the screen area as possible)

Tension springs have six adjustments to set angle of screen and tension on the screen assembly.

Screen with  $\frac{3}{4}$ " openings has two centre flat bar hold-downs and two angle iron hold-downs on each side to prevent run-off.

Screenings drop into ample holding area approximately 9 feet wide x 4 feet high for easy access with buckets up to 8 feet wide.

New vertical tillage concept by HCC Inc. features patented self sharpening tines in a three tine configuration followed by adjustable rolling harrows.

Unit can be purchased less the rolling harrows. Machines with harrows can be operated with harrows lifted or with varying rates of penetration and different angles allowing for varying finish results.

Extremely heavy frame and tongue provide excellent downward pressure. At the same time the rolling aerator tines are protected from impact by 'C' shanks.
