FORESTRY WINCHES

Twenty years in the forestry winch business has given Harco a tremendous insight into the needs of customers in Eastern Canada and U.S.A. We have designed our Big Jim series winch with that in mind and came up with a winch that is stronger in several areas & is more ergonomically appealing to the customer. Our brochure lists many significant improvements in winch design and we are sure you will find much lower cost of service and repair as the Big Jim Winch uses North American bearings, drive chain & sprockets.

New vertical tillage concept by HCC Inc. features patented self sharpening tines in a three tine configuration followed by adjustable rolling harrows.

Unit can be purchased less the rolling harrows. Machines with harrows can be operated with harrows lifted or with varying rates of penetration and different angles allowing for varying finish results.

Extremely heavy frame and tongue provide excellent downward pressure. At the same time the rolling aerator tines are protected from impact by 'C' shanks.

Dual wheels are standard on all machines.

The Halverson Wood Products Hydraulic Power Unit (HWP-HPU) was specifically designed to power Halverson Firewood Processors on tractors that do not have the proper hydraulic flow. This new product was born from the launch of the HWP-100 processor, and allows tractor owners to utilize our HWP-100 or HWP-120 processor (by adding a case drain fitting) in conjunction with the HWP-HPU.

There are two versions of the HWP-HPU, one with a cooler (radiator) and fan, and one without.
