

T264

Sub-Compact, Series 2
24 hp

Packed with features to help accomplish your goals

Get more work done quicker with this small-frame tractor. The T264 balances maximized lift capabilities and high maneuverability to be an all-round multi-tasking machine.

1. Optional loader with high lift capacity

2. PTO on/off switch

3. Dual filter air cleaner

4. Cruise control

5. Foldable ROPS or heated cab

6. Joystick control for front loader

Ergonomic features for enhanced productivity

A wide operator cabin with a flat floor offers good visibility and ample leg room, promoting comfortable operation. All controls are within arms' reach, including a dial to control the cutting height of the mid-mount implement. The accelerator, brake pedal, differential lock and parking brake are easily accessible on the floor of the cabin, located precisely where you expect them to be. These features make this tractor easy to operate, even for novice drivers.

Simple and effective Kukje engine

This tractor comes equipped with the South Korean-made Kukje engine and is naturally aspirated. The minimal design and minimized emissions results in a more efficient engine, lowering fuel and maintenance costs.

High capacity fuel tank to support time intensive work

The high capacity fuel tank allows drivers to take on jobs for longer periods without stopping for fuel. This is in addition to the engine, which promotes fuel-efficient operation and increases the time before a refuel.

Dual filter air cleaner for engine longevity

The tractor comes with an additional filter to protect the engine of the tractor from harmful particles, drastically extending the engine life.

Cast iron components for sturdier connections

To perform durably with heavier loads, the rear of the rear of this tractor features sturdy cast-iron components to connect implements. The material enhances efficiency of the hydraulics and helps increase component lifecycles.

Easy to open hood for convenient maintenance

The tractor hood can be opened in one motion, providing easy access to the engine and other systems for daily checks, routine service and maintenance. The side panel can also be removed easily without the need for specialized tools.
