

GAS CURVED SHAFT TRIMMERS

STIHL grass trimmers and brushcutters quickly tame long grass and undergrowth. These machines can be fitted with the appropriate cutting tool for all jobs from mowing small areas of grass to thinning out overgrown thickets.

BENEFITS OF CURVED SHAFTS

Curved shaft trimmers are easier to manoeuvre and more comfortable to use by homeowners. These trimmers are lighter and weigh less than a straight shaft trimmer. In addition, many homeowners find the shorter length of a curved shaft trimmer is more convenient to operate.

GAS STRAIGHT SHAFT BRUSHCUTTERS

BENEFITS OF STRAIGHT SHAFTS

Straight shaft brushcutters equipped with a loop handle are the choice of lawn care professionals and large property owners. They have more power, a longer reach and are better able to manage heavy brush and thicker weeds when equipped with the proper cutting tools. Straight shaft brushcutters can be equipped with a wide variety of cutting attachments.

Loop handles are not to be used with metal blades for cutting wood. STIHL recommends that a bike handle configuration in combination with a metal blade be used when cutting larger diameter wood stalk.

GAS HANDHELD BLOWERS

STIHL's high-performance **handheld blowers** help you eliminate wet layers of leaves and tackle clippings, small branches and grass. The blowers are ergonomically designed, easy to operate and very easy to start.

GAS SHREDDER VACS

STIHL **shredder vacs** are actually two powerful tools in one: a powerful shredder as well as a fuel-efficient blower. Each STIHL shredder vac features a specially designed shredder blade located on the fan wheel. This efficient design reduces yard waste at a 14:1 ratio for dry leaves. As it shreds, the clippings accumulate in a secure, easy-open zippered bag for convenient emptying. The tube makes it easy to get in-between shrubs and other hard-to-reach places.

GAS BACKPACK BLOWERS

STIHL has made orange even greener by reducing emissions and noise compared to previous models. Our lightweight **backpack blowers** are built on a padded polymer frame with adjustable straps and a foot pad for smooth, stable starts. The upright, translucent fuel tank lets you easily check and quickly replace fuel. Control is in the palm of your hand with the joystick handle and stop switch that decreases the chance of accidental shutoff. Clear your path quickly and quietly and save your back with a comfortable STIHL backpack blower.

Easy 2 Start™ The revolutionary STIHL Easy2Start™ system eliminates the need for a strong pull of the starting cord - virtually eliminating jerky, false starts. Select models feature our simplified starting procedure that dramatically reduces the number of steps required to start. Getting your power tool started easily will help motivate you to get the job done.
