

X9 COMBINES

X9 1000 and X9 1100

JOHN DEERE

UP TO 7200 BUSHELS PER HOUR¹ IN HIGH-YIELDING CORN

You have a tight harvest window and an even tighter profit margin. You need more productivity and low losses. You need a combine that can get as much done in a day as you need it to — day in and day out, season after season.

You need an X9 Combine. These combines deliver an average of 45% more harvesting capacity across all crop types, with no sacrifice in grain quality — all while using 20% less fuel². The X9 1100 can harvest up to 30 acres an hour in wheat; in high-yielding corn, the X9 1100 can harvest up to 7,200 bushels (253,700 litres) per hour, which means which means you can fill up to 7 semi-trailer trucks per hour³.

¹ Based on internal testing. Performance will vary based on field and crop conditions.

² Internal comparison between X9 1100 and S790 combines. Savings will vary based on field and operating conditions.

³ Semi-trailer trucks with 993-bushel (34,992.4 litres) capacity. Specifications and design subject to change.

4-5	X9 Capacity

UNPRECEDENTED PRODUCTIVITY

Two 24-in (609-mm) rotors offer 45% more threshing area and 80% more separating area¹ for better threshing and separating in high-volume crops.

Harvest up to 33 more acres per day with a John Deere 50-ft (15.2-m) HDR Hinged Draper compared with similar 45-ft (13.7-m) drapers¹.

Even with a 23% wider feederhouse¹ and more threshing and separating area, the outside dimensions are about the same as the S790, for tight turns and narrow transport.

Unload a full tank in about a minute and a half — up to 5.3 bushels (186.7 litres) per second! Choose from three power-folding auger lengths.

The cleaning system offers 36%² more cleaning area¹ to effectively put clean grain in the tank in the toughest conditions.

THE X9 COMBINES HAVE CAPACITY GAINS COVERED.

¹ Internal comparison between X9 1100 and S790 combines.

² S790 with no front chaffer extension.
Pre-production model shown. Specifications and design subject to change.

YOUR **BEST HARVEST,** MADE BETTER

Every aspect of our design process considered how to make these combines more efficient. It wasn't just the engine that delivers lower fuel costs, but also belts, transmission, residue system, and rotors.

The X9 Combine delivers up to a 45% increase in harvesting capacity, while only needing 11% more horsepower than an S790¹. Plus, there's 30% more torque to handle larger loads with a smooth power increase thanks to the ProDrive™ XL transmission¹.

Our simplified belt-drive system uses larger pulleys and more robust belts to improve the handoff of power and belt wear-life. And the residue system spreads up to 50 feet (15.2 meters) wide; the double-decker design provides better air flow for even distribution with less power consumption¹.

HARVEST DATA, YIELD PRODUCTIVITY

G5^{Plus} CommandCenter™ Display

Get more harvest data on the larger, faster, and clearer G5^{Plus} Display.

- **Larger Screen Size-** See more and easily make machine adjustments with a 35% larger viewing screen¹. Add a G5^{Plus} Extended Monitor for even more space for yield maps, camera feeds, and more.
- **Faster Processing Speed-** Get harvesting faster with quick boot times.
- **1080p Resolution-** Catch every detail on our most advanced displays, with visual clarity in any condition.
- **Easy Adoption-** Easily transition from Generation 4 to G5^{Plus} with a similar easy-to-use operator experience.

¹Compared to the Generation 4 4600 CommandCenter

G5 Advanced Package with SF-RTK

Harvest more precisely, with less stress, with the G5 Advanced Package. It provides unmatched flexibility in harvest technology through lower up-front cost with an annual license. It also gets better over time as you'll get access to new features when they are released. You only pay for what your farm needs through year-to-year flexibility and machine-specific licenses. The G5 Advanced Package provide hands-free guidance and logistics features, including:

- **AutoPath™:** Save time and make your job easier in complex fields by eliminating guesswork when deciding which guidance line to use.
- **AutoTrac™ Turn Automation:** Consistently complete precise turns at the end of each pass hands-free, reducing operator fatigue.
- **Machine Sync:** Unload on-the-go and stress-free, even in tough conditions or with inexperienced operators.
- **In-field Data Sharing:** Share as-applied, coverage maps, and field totals data.
- **Combine Auto Unload:** Automatic grain fill positioning lets you focus on other harvesting tasks by giving you more consistent fills and less worry about the grain cart.

ULTIMATE TECHNOLOGY PACKAGE

***MORE ACRES. LESS STRESS.
AUTOMATICALLY.***

Predictive Ground Speed Automation

How many more acres could you harvest if your combine were more predictive and less reactive? Find out with the Ultimate Technology Package which includes Predictive Ground Speed Automation.

Using two forward, cab-mounted stereo cameras – and pre-harvest satellite field images – the X9 generates a predictive field map AND constantly measures crop height and crop density. The combine takes this data and automatically adjusts ground speed BEFORE entering changing crop areas.

That means you can maintain peak feed rates all day long, even in inconsistent crop conditions. That helps you increase combine productivity while minimizing grain loss.

And by anticipating the crop load, the combine has time to gently adjust speed, without the familiar herky-jerky reactive adjustments we've all experienced.

Less stress. More harvested acres. All automatically. Who could've predicted that? Only John Deere.

Ultimate Technology Package can increase productivity up to 20%¹

Harvest Settings Automation

It's your crop. You know what you want out of it. Does your combine? Harvest Settings Automation² – included in the Premium and Ultimate Technology Package – makes it easier than ever to set the specific outcomes you expect. Using your G5^{Plus} Display, simply set acceptable limits for grain loss, foreign material, and broken grain.

Once set, the combine automatically adjusts itself to deliver the performance you want. No more manually adjusting rotor speed, fan speed, and concave, chaffer, and sieve clearances. The combine does it for you according to outcomes you've already prescribed.

That gets you into crops faster and reduces the things you have to constantly monitor. When set limits are exceeded, your display shows you where the setting adjustment is being made and why. Plus, your G5^{Plus} Display comes preloaded with a variety of harvest modules, so you customize your harvest run pages to monitor things like grain loss and yield and productivity history. That means less switching from page to page, allowing you to focus on other things.

You can also apply automatic offsets to your cleaning shoe settings while crossing already harvested area, such as headlands. That helps reduce grain loss potential as you transition between harvested and unharvested crops.

¹ Based on anonymized Ops Center data comparing John Deere combine models with and without Predictive Ground Speed Automation. Productivity represented by tons of crop per hour. Results will vary depending on model, crop and field and operating conditions.

² Available in both Premium and Ultimate license packages and includes factory-installed hardware, such as cameras and more.

GRAIN MORE CONTROL

Adjustable Auger Spout

With the Adjustable Auger Spout, you can adjust auger positions right from your cab. That makes it easier to fill carts or trailers on the go, and reduces grain spillage that can lead to volunteer crops.

HarvestLab™ 3000 Grain Sensing

Grain quality matters. And the best way to monitor it is with HarvestLab 3000. HarvestLab automatically measures – on the go – moisture, protein, starch, and oil values in wheat, barley, and canola. HarvestLab records and maps small grains data as it's harvested. By viewing this data directly in your combine – or in John Deere Operations Center™ – you can:

- Increase profits per bushel (litre) by up to \$0.29 per percentage point of protein above 11%¹. Market your grain for highest potential returns and take advantage of premiums for constituent values, such as protein.
- Prepare for the next growing season. Get a \$5 to \$15 per acre profit potential² by knowing your protein and yield. This tells you accurately how much nitrogen was removed, so you know what needs to be replaced to get the best yields next year.
- Reduce input costs and maximize yield and protein. With the right information, you can improve nutrient management or variety choice by simply targeting field areas where high-protein grain was harvested and focusing on areas that didn't reach the quality or yield targets.

Cross Auger Shutoff

Standard on X9 Combines, the cross auger shutoff automatically empties your unloading auger, which reduces the weight of the auger. Less weight means less power drag on your combine.

¹ US dollars at time of study. Based on USDA Wheat Protein Premium and Discount scales. Grain Protein Premium and Discounts vary by geography, time of year, and year.

² Based on Internal Trial in 2020 Winter Wheat, Kansas, USA. Results could vary by geography, season, and environmental conditions.

READY FOR AN ALL-DAY STAY

Our most comfortable cab, for when your days start early and end late. Because when it's time to harvest, you've got no time to be anything other than ready to go. Choose from three **Comfort and Convenience Packages**.

COMFORT PACKAGES

SELECT

Cloth air suspension seat with mechanical controls and lumbar support
Foot rests
Heat and air-conditioning vent at the base of the seat
Five cupholders
Accessory rail with tablet mount
USB and power ports

PREMIUM

Cloth air suspension seat with electronic controls and lumbar support; 16 degrees of swivel to the left and right
Foot rests
Refrigerator
Touchscreen radio (satellite and smart phone ready)
Five cupholders
Accessory rail with tablet mount
USB and power ports

ULTIMATE

Appointed leather seat with electronic controls and lumbar support; left-hand and right-hand swivel; heated, ventilated; massaging feature
Auto-cinching door
Foot rests
Refrigerator
Touchscreen radio (satellite and smart phone ready)
Five cupholders
Accessory rail with tablet mount
USB and power ports

SUSPENSION PACKAGES

Two packages offer you a choice in seat suspension.

PREMIUM

Cloth seat with air suspension

ULTIMATE

Includes ActiveSeat™ II

Significantly reduces vertical motion up to 90% compared to the premium package

NIGHTTIME DOESN'T MEAN SLOWING DOWN

Harvest days often end in the dark and you can choose from two Visibility Packages to help you knock out the acres, no matter what time of day you are working. Visibility Packages can be mixed or matched with your choice of Comfort and Convenience Packages.

PREMIUM	ULTIMATE
LED lights under each wing	360-degree LED lights
Electric and heated mirrors	LED lights under each wing
Front sunshade	Electric and heated mirrors
Back-up camera	Front sunshade
Grain tank mirrors	Right-hand sunshade
	Back-up camera
	Grain tank and unloading auger cameras
	Lighting on sides of combine and under the grain tank covers

SIGNATURE EDITION

With the release of the X Series Combines, John Deere unveiled the John Deere Signature Edition for combines. This brings together the top-level features and functionality. It includes all the Ultimate packages that are available, making harvest more comfortable with the best visibility and more precision than ever before.

The Signature Edition includes the Ultimate Comfort and Convenience Package, the Ultimate Visibility Package, Ultimate Suspension Package, and the Ultimate Technology Package.

TAKE YOUR HARVEST TO A HIGHER LEVEL

The X9 Combines offer three technology packages that keep efficiency and productivity at the highest possible level. From data tools like John Deere Operations Center™ to AutoPath™ and Harvest Settings Automation,¹ to guidance options that range from an integrated receiver² for hands-free steering and tractor/grain cart control — the X9 delivers. And whether you're away visiting family or watching your kid's football game, you can learn what you need about your operation with our mobile apps.

OPERATIONS CENTER MOBILE

Manage your harvest from anywhere with the Operations Center Mobile app. Remotely view harvest information such as yield, moisture, and area worked. And you can now remotely view and adjust combine settings. Plus, you can leverage historical map layers, as well as harvest summary information.

CONNECT MOBILE

Being able to make decisions about next year's crop based upon an evaluation of this year's crop performance during harvest is a valuable tool. Connect Mobile lets you view two live maps for a single field so you can determine what worked well and what did not, all while harvesting.

Apps are available on the Apple App or Google Play™ store.

* 12 month/ unlimited hour warranty on new OEM agricultural parts installed by an authorized John Deere dealer. 6 month/ unlimited hour warranty for all new John Deere agricultural and turf equipment parts. Terms, conditions, exclusions and warranty limitations apply. See John Deere Service Parts Warranty US & Canada and participating dealers for more details.

** Offer ends March 31, 2026. Financing on approved John Deere Financial credit only. Contact your Multi-Use Account merchant or dealer for complete details.

ADDITIONAL OPTIONS FOR THRESHING AND SEPARATING ENHANCEMENTS

KONDEX® REVOLUTION™ HALF-WIDTH CONCAVES

Versatility to match varying crop conditions. These concaves provide robust, yet gentle threshing ability in tough-threshing crops, like green stemmed-beans. Their half-width size makes them light and easy to change and install. Two-piece bundle options are offered for small or coarse grains and are commonly paired with OEM concaves in positions 2 and 3. Available in single configurations only.

Kondex is a registered trademark of Kondex Corporation.

CONCAVE THRESHING INSERTS

Made for round-bar concaves, these inserts enable flexibility to harvest additional crops by increasing threshing where inserts are installed.

CONCAVE COVER PLATES

Cover plates install on the bottom side of the concave, encourage even distribution of material in the cleaning shoe, and provide additional threshing for small grains.

SEPARATOR GRATE COVER

Adjustable for various crop types and conditions, John Deere separator grate covers help improve separation and increase yield potential. One bundle covers one grate on each rotor (two may be needed for extremely dry crops).

THRESHING ELEMENTS

John Deere threshing elements help you reduce grain loss and maximize throughput with X Series automation technology, which adjusts settings based on crop type, conditions, and operator preferences.

SEPARATOR TINES

Separator tines from John Deere are engineered to separate grain from the straw and other materials, while minimizing grain damage. Suitable for different crops, conditions, and harvesting preferences.

CAB ENHANCEMENTS

FOOT RESTS

Improve comfort while harvesting with this simple upgrade.

HEATED FLOOR MAT

Keeps you warm by conducting heat directly over your feet from an internal heating element.

TABLET MOUNT

Keep your data in plain sight and secure with an in-cab tablet mount.
