

The ARGO CAT 23 Widebody Super- Sport Catamaran

The next generation of Argo Cat performance has arrived. Now with a new widebody hull, boasting 5 inches wider than our previous design and optimized to delivery maximum performance. We have also expanded the cockpit to provide 2+2 seating arrangement, while maintaining Argo's proven aerodynamic design and architecture. Argo's racing heritage and championship winning performance is now available to the performance boating enthusiasts who also demands the best of both worlds.

Fully Composite Hull Construction

The Argo Cat 23 Widebody hull is built for high performance and are fully composite(no wood). The hulls are hand built and can be hand laid or vacuum infusion technology based on customer request. We utilize the highest quality and race proven materials throughout the hull including composite core, along with composite board for the transom, bulkheads and stringers. Bi-axial and Tri-axial Fiberglass and Vinyl Ester ensures maximum strength and durability. Fiberglass and Kevlar layup is also available as an upgrade.
